is up to you*

## Feature-Packed and Amazingly Easy to Use

The Magellan Triton 1500 reinvents handheld GPS navigation by combining the world's first handheld touch-screen interface with precise navigation and exceptional ease of use. Completely re-engineered both inside and out, the Triton 1500 also features the rugged, waterproof design and advanced feature set that outdoor enthusiasts need and expect.

### Key Features and Benefits:

- 2.7" (6.9 cm) QVGA full-color touch-screen display—the first handheld GPS that allows users to interact directly with maps and menus
- LED flashlight—illuminates the darkness for added convenience at night
- Embedded speaker and microphone—enable users to record audio files they can associate with geographic locations

## User Manual Optional

The Triton 1500 is so easy to use that its user manual may never make it out of the box. The "Go To" menu includes friendly icons and helpful categories like Go To, Create, and View. From there a few 'Go' button clicks are all that's needed to navigate its many advanced features. No Ph.D. required!

## Additional Product Features

### Detailed Maps

Detailed, uploadable maps and pre-loaded base maps identify major rivers, lakes, cities, and other geographical boundaries. The Triton 1500 also allows users to upload third-party topo and street maps.

### Extremely Rugged and Waterproof

The Triton 1500's rugged design defeats harsh environments. It's built to withstand a drop to concrete and is also waterproof to IPX-7 standards—which means it can be immersed in up to one meter of water for as long as 30 minutes.

### Clear Reception

An integrated, low-power, high-sensitivity antenna offers clear reception, even in heavy cloud cover and deep canyons. An added strap loop function allows users to hang the Triton 1500 from their backpack in view of the sky to collect data.

### Memory Boost

Storing data, including additional maps, MP3 files, photos, and geocache data is easy with the Triton 1500's expandable SD card slot.
