

DIRECWAY® Enterprise Service Plans

Empowering the enterprise with a choice in broadband

DIRECWAY®

DIRECWAY® is a family of broadband satellite solutions brought to you by Hughes Network Systems (HNS), the global market leader in providing satellite products and services to enterprises, governments, and consumers. DIRECWAY satisfies the global demand for bandwidth by offering a variety of highspeed multimedia hardware, software, and service solutions.

HNS is unlocking the value of broadband by providing you with a choice of new high-performance broadband satellite service plans designed from the ground up with your business requirements in mind. HNS' new DIRECWAY Enterprise Service Plans, from the entry-level Enterprise 100 to the high-performance Enterprise 900, allow you to run your organization more efficiently and more cost effectively, with more users and more applications than ever before, anywhere in North America.

tions such as digital signage, streaming video, content delivery, and training.

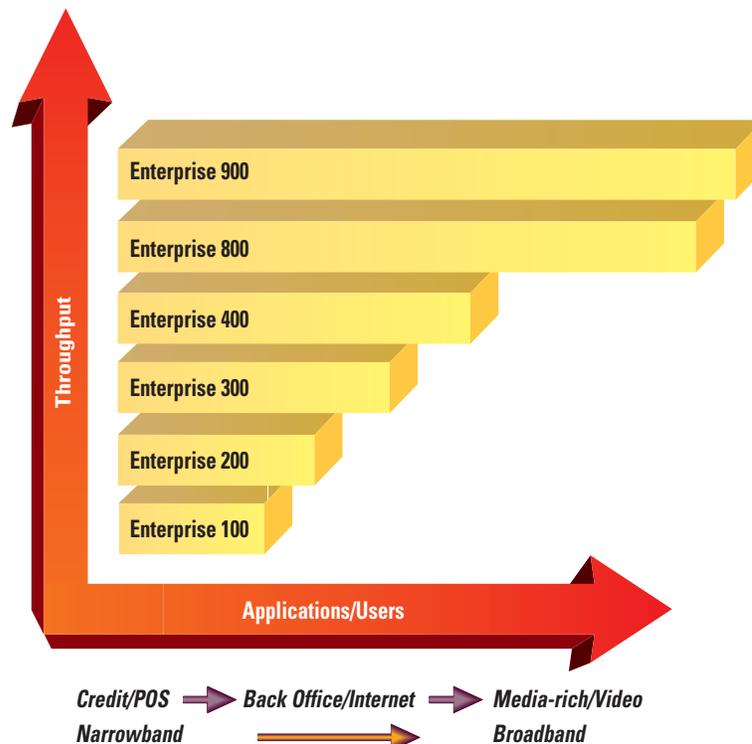

The Enterprise service plans operate on the new high-performance DW7700 satellite broadband router. You choose the plan that best suits your needs today and you can easily upgrade to a different plan as your requirements grow, without costly upgrades to your network infrastructure. Your network is "future proof."

Each enterprise service plan is designed to securely support business critical applications ranging from e-payments to back office intranet applications up to bandwidth-intensive applica-

With the introduction of the DIRECWAY Enterprise Service Plans, HNS has taken the "rocket science" out of satellite networking. Each plan is characterized by not only the application and number of users it is designed to support, but also the speed of the service.

Each plan has a typical effective user rate and "burst" rate making it easy for you to match the service plan to your business requirements.

Providing the utmost in flexibility, each remote site can have a unique service plan that is best suited to that location, all under the same network umbrella. Your distribution centers may require one of the high-end plans, while your retail locations can utilize one of the entry-level plans designed to support e-payments—or more—it's all about choice.

Enterprise Service Plans

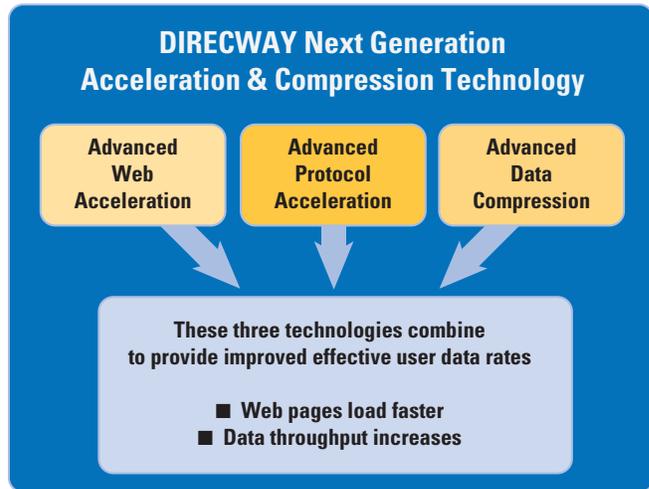

Service Plan	Applications	Effective User Data Rate Using DIRECWAY Acceleration & Compression Technology*	
		Upstream	Downstream
Enterprise 100	Fast, "always-on," economical support for retail credit and PoS transactions for fast network response times (~2.5–3 sec.)	Burst up to: 120Kbps Typical: n/a	Burst up to: 250Kbps Typical: n/a
Enterprise 200	Designed for full range of retail applications (POS, credit, polling, help desk) with intranet access needs	Burst up to: 250Kbps Typical: 120 Kbps	Burst up to: 1Mbps Typical: 750Kbps
Enterprise 300	For multiple applications or larger branch offices with intranet access needs	Burst up to: 500Kbps Typical: 250Kbps	Burst up to: 1.5Mbps Typical: 1Mbps
Enterprise 400	For multiple applications or larger branch offices with Internet/intranet access (e.g., high-speed web/ e-mail/ file transfer)	Burst up to: 500Kbps Typical: 250Kbps	Burst up to: 1.5Mbps Typical: 1Mbps
Enterprise 800	Designed for high, bandwidth intensive applications or larger branch offices	Burst up to: 1Mbps Typical: 500Kbps	Burst up to: 1.5Mbps Typical: 1.25Mbps
Enterprise 900	Designed for high, bandwidth intensive applications or larger branch offices	Burst up to: 2Mbps Typical: 1Mbps	Burst up to: 2Mbps Typical: 1.5Mbps

Other value-added service options available with these plans include:

- Fenced Internet
- Auto-dial backup
- Multimedia Service (MMS)
- VPN Acceleration

Applications are for illustration purposes and should be used as a guide. All services utilize the DW7700 satellite broadband router. Professional installation and standard maintenance plan required.

* Actual data rates listed may vary and are not guaranteed. Interactive web pages and compressible data files can benefit from HNS' satellite acceleration and compression technology. Typical data rates listed represent speeds attainable for a 2:1 compressible data file. For incompressible data files, data rates may be reduced. Commercially available speed measurement tools may not use compressible files and therefore may not provide the same results. All service plans are subject to HNS' standard Fair Access Policy. Service plans are subject to change.
