3 Available from GSM Cellular Mode.
4 Available in Extended Menu.
5 Network and subscription-dependent feature.
SATELLITE MODE HELPFUL HINTS

- Need clear view of sky, outdoors, away from buildings and tall structures. Rotate and fully extend antenna into a vertical position.

- Wait until registration is complete (you will see Registered and the and indicators). If no registration (missing), press E8.

- To dial, press: [00] or [0 and hold for two seconds], [country code], [phone number].

- Talk with antenna above your head and vertical to the ground.
Getting Started

1. Rotate and extend the antenna.

2. Remove battery door.

3. Insert the SIM card.

4. Push down and slide the SIM card tray to the right.

5. Remove battery’s protective cover.

6. Install the battery by matching arrows on phone and battery.

7. Attach battery door cover or optional Cellular Cassette.

8. Attach charging device.

9505 PORTABLE QUICK REFERENCE

Basic Operation

Turn the phone's power on/off:
Press and hold .

Place a call:
Rotate and extend the antenna in a vertical position. To dial, press: [00] or [0+ and hold for two seconds], [country code], [phone number].

Answer a call (with antenna rotated and extended):
Phone rings and/or vibrates After Call followed by Answer? is in display, press .

Answer a call (with antenna stowed):
Phone chirps Rotate and extend antenna Phone will ring and/or vibrate After Call followed by Answer? is in display, press .

End a call:
Press .

Adjust earpiece volume:
Press upper and lower volume keys on the side of the phone.

Adjust ringer volume:
Press and then the upper and lower volume keys on the side of the phone.

Clear the last digit in the display or exit a submenu:
Press .

Clear the entire display or exit the menu system:
Press and hold .

Select prompt language:
Press and hold to return to idle display.
Press to go to the language selection submenu.
Press until you see the preferred language.
Press to select.

Special Features

Display your phone number:
Press .
Also refer to the “View Your SIM Card Phone Number(s)” section of the User's Guide.

Switch modes:
1. Press until you see Mode Selection, and then press .
2. Press to scroll to Cellular Preferred, Satellite Preferred, Cellular Always or Satellite Always.
3. Press to select.

Quick Access Menu

Phone Book

Recall a number from the phone book:
1. Press .
2. Enter the one-, two-, or three-digit location number of the entry, and then press .
3. Press to call the displayed entry.

Recall last ten numbers dialed:
1. Press until you see Phone Book, and then press .
2. Press to scroll to Last Ten Calls, and then press to select.
3. Press to scroll to Last Calls Made and then press to select.
4. Press to scroll to the number you are looking for.
5. Press to place a call to that number.

Special Features Continued

Keypad disable:
Press and keys simultaneously to prevent accidental usage of the phone. All keys with the exception of the key will be disabled. You can still answer an incoming call by pressing when the keypad is locked. To remove the keypad disable, press and simultaneously.

Factory default for satellite and cellular mode.

Welcome

The future of global telecommunications is here—a satellite telephone, providing you with communication in many remote areas around the world.

Motorola proudly introduces its next generation Satellite Series™ 9505 portable phone for the Iridium® satellite system.

All Motorola wireless phones are designed and manufactured to meet Motorola’s exacting specifications and world-class quality standards. During development, our laboratory testing team performed rigorous durability tests including temperature, humidity, shock, dust, vibration, and drop tests—and it still worked! We are confident that the phone you purchased meets your own exacting standards.

Thank you for choosing Motorola, a global leader in communications technology.

Enjoy your new Satellite Series™ 9505 portable phone!

Important: Read this information before using your wireless mobile phone.

Exposure to Radio Frequency Signals

Your wireless mobile telephone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals.

International agencies have set standards and recommendations for the protection of public exposure to RF electromagnetic energy.

- International Commission on Non-Ionizing Radiation Protection (ICNIRP) 1996
- Verband Deutscher Elektrotechniker (VDE) DIN-0848
- National Radiological Protection Board of the United Kingdom, GS 11, 1988
- American National Standards Institute (ANSI) IEEE. C95. 1-1992
- National Council on Radiation Protection and Measurements (NCRP). Report 86

These standards are based on extensive scientific review. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the updated ANSI standard.

The design of your phone complies with these standards when used as described under “Phone Operation” on page 8.

Antenna Care

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate local agency regulations.
**Phone Operation**

**Normal Operation:** Hold the phone as you would any other telephone. Rotate the antenna so that it points straight up. The antenna will click into place in one of two positions designed for left- or right-handed use. Make sure the antenna is fully extended. The antenna should be vertical to the ground and have a clear unobstructed view of the sky.

**Tips on Efficient Operation:** For your phone to operate most efficiently:

- Rotate and extend your antenna fully.
- Make sure the antenna has a clear unobstructed view of the sky.
- Do not touch the antenna unnecessarily when the phone is in use. Contact with the antenna affects call quality and may cause the phone to operate at a higher power level than otherwise needed.
- Do not wear the phone on your body while making calls with the headset accessory in satellite mode. Wearing the phone on the body can interfere with proper phone operation, since the antenna requires a clear unobstructed view of the sky to access the Iridium® satellite network.

**Batteries**

**Caution:** All batteries can cause property damage, injury or burns if a conductive material, such as jewelry, keys or beaded chains, touches exposed terminals. The material may complete an electrical circuit and become quite hot. To protect against such unwanted current drain, exercise care in handling any charged battery, particularly when placing it inside your pocket, purse or other container with metal objects. When the battery is detached from the phone, your batteries are packed with a protective battery cover; please use this cover for storing your batteries when not in use.

**Driving**

Check the laws and regulations on the use of wireless telephones in the areas where you drive. Always obey them. Observe the following guidelines when using your phone while driving.

- Give full attention to driving—driving safely is your first responsibility.
- Use hands-free phone operation, if available.
- Pull off the road and park before making or answering a call if driving conditions so require.
**Electronic Devices**

Most modern electronic equipment is shielded from RF signals. However, certain equipment may not be shielded against the RF signals from your wireless phone.

**Pacemakers**

The Health Industry Manufacturers Association recommends that a minimum separation of six inches (6") be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research.

Persons with pacemakers:

- should ALWAYS keep the phone more than six inches from their pacemaker when the phone is turned ON
- should not carry the phone in a breast pocket
- should use the ear opposite the pacemaker to minimize the potential for interference
- should turn the phone OFF immediately if you have any reason to suspect that interference is taking place

**Hearing Aids**

Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your hearing aid manufacturer to discuss alternatives.

**Other Medical Devices**

If you use any other personal medical device, consult the manufacturer of your device to determine if it is adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information.

Turn your phone OFF in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

**Vehicles**

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.
**Posted Facilities**

Turn your phone OFF in any facility where posted notices so require.

**Aircraft**

Airline regulations prohibit using your phone while in the air. Check and comply with the policy of your airline regarding the use of your phone while the aircraft is on the ground.

Switch OFF your phone before boarding an aircraft.

**Blasting Areas**

To avoid interfering with blasting operations, turn your phone OFF when in a “blasting area” or in areas posted: “Turn off two-way radio.” Obey all signs and instructions.

**Potentially Explosive Atmospheres**

Turn your phone OFF and do not remove your battery when you are in any area with a potentially explosive atmosphere. Obey all signs and instructions. Sparks from your battery in such areas could cause an explosion or fire resulting in bodily injury or even death.

Areas with a potentially explosive atmosphere are often but not always clearly marked. They include, but are not limited to: fueling areas such as gasoline stations; below deck on boats; fuel or chemical transfer or storage facilities; areas where fuel odors are present (for example, if a gas/propane leak occurs in a car or home); areas where the air contains chemicals or particles, such as grain, dust, or metal powders; and any other area where you normally would be advised to turn off your vehicle engine.

**For Vehicles Equipped with an Air Bag**

An air bag inflates with great force. Do NOT place objects, including both installed or portable wireless equipment, in the area over the air bag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

**AC Travel Charger with International Plug Kit**

TUV Product Services Approval only applies when the Europlug adapters are used with this product.

Die TÜV-Zulassung ist nur gültig, wenn das Gerät mit Europlug-Adaptern verwendet wird.
Overview

This chapter provides an overview of this user’s guide, your new satellite phone, and available Satellite Series™ accessories.
**Guide Overview**

**Modes**

Some phone features described in this user's guide apply only to satellite mode. Other features apply only to cellular mode (when you have an optional Cellular Cassette installed). The following conventions alert you to these features:

- This symbol next to a feature name indicates that your phone must be in satellite mode to access the feature.
- This symbol next to a feature name indicates that your phone must be in cellular mode to access the feature.

In addition, look for the labels **Satellite Mode** or **Cellular Mode** in the margins for information related to each mode.

**Key Presses**

Key presses are represented in this guide using symbols. A sequence of key presses may be shown as follows:

![Menu] ![Ok] ![Clear]

This means you should press ![Menu] followed by ![Ok] and then ![Clear], in sequence, not simultaneously.

**Prompts and Messages**

Your phone responds to key presses by displaying either a prompt that guides you to the next action or a message confirming that your action is complete. Prompts and messages are represented in this guide in LCD style, for example: Enter PIN or Completed.

**Tips**

In the margins of this guide are useful hints and ways to optimize your phone’s performance.
Note: See pages listed after feature name for additional information.
Note: Phone shown with antenna in stowed position.

Volume Control Keys

The volume control keys are located on the left side of the phone. They adjust earpiece and ringer volume. See “Adjust Earpiece Volume” on page 54 and “Adjust Ringer Volume” on page 55 for more information.

Satellite Antenna

When you are in satellite mode, you must rotate and fully extend the satellite antenna to answer calls, make calls, and access satellite services.* See “Holding the Phone” on page 44 for more information.

When you are in cellular mode you do not need to rotate or extend the satellite antenna.

* Satellite products require a clear line of sight to satellite.
**Satellite Antenna Lock Release Button**

This button releases the satellite antenna so you can attach the auxiliary antenna. You may also want to remove the satellite antenna if you spend a lot of time in cellular mode.

**Cellular Cassette Connector**

Insert an optional Cellular Cassette onto the back of the phone. The Cellular Cassette connector is located underneath the battery compartment cover next to the battery. The Cellular Cassette interfaces with your phone so that you can use it on the local cellular network.

**Display**

Your phone’s Liquid Crystal Display (LCD) displays as many as four rows of 16 characters.

The LCD on your phone may respond slowly to key presses in extremely cold temperatures. This is normal and does not affect the phone operation in any way.

**Headset Jack**

The headset jack located on the right side of the phone provides a connection for an optional headset.

**Infrared Data Port**

An infrared data (IrDA) port located on the left side of the phone allows wireless communication with an external device such as a personal computer.

**Accessory and Power Connector**

This connector, located on the bottom of the phone, provides the connection for an external power supply or a data cable.
Status Indicator

The status indicator is located at the top of your phone. This LED indicator provides information on your phone’s current state of service depending on your mode.

<table>

Satellite Series™ Accessories

Product appearance and specifications are subject to change without notice.

Note: For maximum performance use only Motorola Original™ accessories.

Batteries

Standard Capacity Lithium Ion Battery

- Provides up to 2.4 hours of talk time or 24 hours of standby time*
- Weighs 2.3 ounces/66 grams

High Capacity Lithium Ion Battery

- Provides up to 3.6 hours of talk time or 38 hours of standby time*
- Weighs 3.4 ounces/98 grams

Ultra High Capacity Lithium Ion Battery

- Provides up to 7.6 hours of talk time or 72 hours of standby time*
- Weighs 7 ounces/200 grams

* All talk and standby times are approximate and depend on network configuration, signal strength, and the features selected.
**AC Travel Charger with International Plug Kit**

The AC travel charger with international plug kit provides rapid charge for optimal performance and can be used to power the phone when the battery is depleted.

- Includes four international plug adapters for use in Europe, Australia, India, and the United Kingdom
- May be used with both the 9505 portable phone and desktop charger
- Allows you to use the 9505 portable phone while recharging the battery
- Convenient self-storing cord
- Charges StarTAC© wireless phone when used with optional StarTAC adapter
**Auto Accessory Adapter**

Restores full battery power for portable phone operation or desktop charger functions from any operating vehicle (using standard 12-volt accessory connector port).

- Make and receive phone calls using the auto accessory adapter for direct power when batteries are depleted
- Recharge battery while using the desktop charger or attached to portable phone
- Charges StarTAC© wireless phone with optional StarTAC adapter

**Headset**

The convenient headset provides both an earpiece and microphone in one small unit for simple hands-free and private telephone conversations. The headset plugs directly into the jack on the right side of your phone.
Portable Auxiliary Antenna

From one car to another, this compact pocket-sized antenna with convenient magnetic mount goes in every vehicle you do to provide improved reception.

- For use with the portable phone
- Reliable magnetic mount, ceramic patch antenna
- Attached 1.5-meter (4.9 feet) cable

Note: The use of wireless devices and their accessories may be prohibited or restricted in certain areas. Always obey the laws and regulations on the use of these devices.

Antenna Adapter

This adapter provides the required external antenna connection to use your 9505 portable phone with the portable auxiliary antenna.

Carry Case

This high-quality leather case helps protect your phone. It includes a belt clip and a lanyard wrist strap.
**Lanyard Wrist Strap**

The lanyard wrist strap is made of nylon. It provides a convenient way to carry your phone.

---

**Cellular Cassettes**

Cellular Cassettes are modules that attach to the 9505 portable phone and provide support for various terrestrial or land-based cellular systems. With an attached Cellular Cassette, you can make and receive calls in various cellular modes, assuming service subscription and coverage are available.

Cellular Cassettes create an innovative blend of cellular and satellite technology in one phone.

- When attached to the back of the 9505 portable phone, Cellular Cassettes enable dual mode satellite and cellular operation.
- Cellular Cassettes enable flexible usage of cellular technologies and provide call delivery compatibility in areas that support cellular service.
Getting Started

Getting started with your new satellite phone is easy. Just insert your phone’s SIM (Subscriber Identity Module) card and charge the battery. This chapter shows you how.
Attaching the Satellite Antenna

Attach the Antenna

1. Attach the antenna in the down position.

2. Press and hold the lock release button at the top of the phone.

3. Push the antenna until it clicks into place and release the button.

Remove the Antenna

You may want to remove the satellite antenna to attach an auxiliary antenna, or if you spend the majority of your time in cellular mode.

1. Place the antenna in the down position.

2. Press the button at the top of the phone.

3. Remove the antenna by pulling straight out.
What Is a SIM Card?

Your SIM (Subscriber Identity Module) card is a small smart card that contains your phone number, service details, and memory for storing phone book entries and messages. This means you can use your SIM card with any phone for the GSM system or any Motorola product for the Iridium satellite system, and all calls go on your account.

**Note:** Your phone has limited functionality without the SIM card.

**GSM SIM Card Capability**

If you already have a GSM SIM card and your service provider has a roaming agreement with the Iridium satellite system, you can use it in your satellite telephone. You need an optional Cellular Cassette to access your local cellular/PCS service.

**Note:** If you are using a GSM SIM card, you may not have access to certain features that are specific to the Iridium satellite system, and vice versa.

**SIM Card Protection**

You may want to keep your SIM card in your wallet or purse when you are not using your satellite phone. This helps keep your personal information secure and gives you access to your service even if your phone is not available. If you forget your phone, insert your SIM card into a friend’s phone to access your personal service.

**Caution:** Do not bend or scratch your SIM card, and avoid exposing your card to static electricity, water, or dirt.
Installing/Removing the SIM Card

The SIM card is stored in a recess in the battery compartment. It is normally covered by the battery when you use your phone.

**Caution:** Make sure your phone is powered off before inserting or removing the SIM card. If you don’t, you may damage the memory on your SIM card.

1. **Turn your phone off** by pressing and holding the \( \bigcirc \) key.

2. **Remove the battery cover and battery.**
   (See “Remove the Battery” on page 33.)

3. **Slide the SIM card tray** to the left and **lift up** the right side of the tray.
4. **Insert the SIM card into the tray** with the notch up and the gold plate facing out.

   or

   **Remove the SIM card** from the tray.

5. **Push the SIM card tray down** and slide the **tray** to the right to lock it in place.

6. **Replace the battery and battery cover.**
   (See “Insert the Battery” on page 31.)
Your new batteries are shipped uncharged and fitted with protective covers.

Save the covers for storing and carrying unused batteries. The covers prevent metal objects from contacting both battery terminals, which can reduce the risk of injury, or damage from a battery short circuit.

**Remove the Battery Safety Cover**

1. Press in the release latch.

2. Continue pushing in and upwards until the battery slips free from its cover.

**Attach the Battery Safety Cover**

1. Lower the side opposite the latch into the cover.

2. Slip the side with the release latch down until it clicks.
Getting Started

Installing the Battery

Insert the Battery

Note: Insert only Motorola-approved batteries in your phone. If you insert an unapproved battery you will see an Invalid Batt. message. You are able to discharge the battery, but you cannot recharge it.

1. Remove or rotate the satellite antenna before installing the battery. (See “Attaching the Satellite Antenna” on page 26.)

2. Press and hold the release latch at the top of the battery compartment cover.

3. Pull the cover upward, and then remove it from the phone.

4. Align the arrows on the battery with the arrows in the battery compartment. Insert the battery, bottom end first, into the compartment, and then press the battery downward until it clicks into place.

Tip: The battery compartment is located on the back of the phone.
5. **Insert the bottom end** of the battery compartment cover into the slots at the end of the compartment.

6. **Snap the cover** down into place.

If you have an optional Cellular Cassette, see “Installing the Cellular Cassette” on page 39.
Remove the Battery

1. Remove or rotate the satellite antenna before removing the battery. (See “Attaching the Satellite Antenna” on page 26.)

2. Press and hold the release latch at the top of the battery compartment cover.

3. Pull the cover upward, and then remove it from the phone.

4. Press and hold the release latch at the base of the battery.

5. Pull the battery upward and out of the phone.

Tip: The battery compartment is located on the back of the phone.
6. Insert the **bottom end** of the battery compartment cover into the slots at the end of the compartment.

7. **Snap the cover down** into place.

8. **Replace** the battery safety cover. See “Attach the Battery Safety Cover” on page 30 for more information.
Charging the Battery

Any battery that hasn’t been used for a month or more—including new batteries—should be charged for about 3–4 hours before use.

Using the Internal Charger

A battery charger is built right into your phone. Using either the travel charger or auto accessory adapter, you can plug the handset directly into a power source to charge the installed battery.

1. Connect the travel charger or auto accessory adapter to the power connector at the base of the phone.

2. Plug the travel charger or auto accessory adapter into the appropriate power source. The phone beeps, flashes the (battery charge) indicator, and displays Charging Battery:

3. If the phone is powered on, press to place the phone in charge-only mode.

If the phone is powered off, it automatically enters charge-only mode.
**Note:** You can still place and answer calls while using the internal charger. If you wish to place or answer a call:

- **Press @** to exit charge-only mode and return to normal operation.

Remember that talking on the phone uses power, so charging takes more time.

**Using the Desktop Charger**

You can use the front compartment of the desktop charger to charge the battery in your phone. You can also charge a spare battery in the rear compartment. The front compartment charges first, then the charger switches to the rear compartment.

To charge:

1. **Connect the travel charger** to the desktop charger.
2. **Plug the travel charger** into the appropriate power source.
3. **Insert your phone** with a battery installed.
4. **Insert a spare battery** in the rear compartment, if desired.
Checking Battery Charge Level

Low Battery Warning

When the battery level is low and only a few minutes of talk-time remains, your phone signals you in two ways:

- Low Battery appears on the display.
- A warning tone (two double beeps) sounds.

Note: To help maintain the best battery and phone performance, recharge your battery as soon as possible after you receive the low battery warning.

View Battery Meter

The (battery charge) indicator appears continuously in the upper right corner of the display.

You can also display a more detailed battery meter at any time to check the charge level on your battery. See “Viewing the Battery Meter” on page 122 for more information.

This feature is not available in cellular mode.
**Battery Information**

**Maximizing Battery Life**

**Caution:** To prevent injuries or burns, do not allow metal objects to contact or short circuit the battery terminals.

To ensure maximum battery life and use your battery to its fullest capacity, observe the following guidelines.

- Always use Motorola-approved battery chargers.
- Always use Motorola-approved batteries (Standard, High Capacity, Ultra High Capacity battery).
- Maintain the battery at or near room temperature when charging.
- When you do not plan on using a particular battery for a while, store the battery uncharged in a cool, dark, and dry place.
- To prolong the life of your batteries, avoid exposing them to temperatures below -10°C (14°F) or above 45°C (113°F).
- Always take your phone with you when you leave your car.
- Use either the Standard or High Capacity battery when the Cellular Cassette is installed; the Ultra High Capacity battery does not fit when the Cellular Cassette is installed.

**Disposing of Batteries**

To dispose of batteries, check with your local recycling center for a battery recycler near you. Never dispose of batteries in fire.

**Installing the Cellular Cassette**

You can attach an optional Cellular Cassette to your satellite phone to allow it to work with land-based cellular systems.

**Insert the Cellular Cassette**

1. **Remove or rotate the satellite antenna** before installing the Cellular Cassette. (See “Remove the Antenna” on page 26.)

2. **Press and hold the release latch** at the top of the battery compartment cover.

3. **Pull the cover upward**, and then remove it from the phone.

4. **Insert the Cellular Cassette**, bottom-end first, into the compartment on top of the battery.

5. **Press the Cellular Cassette downward** until it clicks into place.

6. **Save the battery compartment cover** for future use.

**Tip:** The phone switches between satellite mode and cellular mode based on your preferences. See “Selecting a Mode” on page 185.

**Tip:** You cannot use the Ultra High Capacity battery when the Cellular Cassette is installed.
Remove the Cellular Cassette

1. **Remove or rotate the satellite antenna** before removing the Cellular Cassette. (See “Remove the Antenna” on page 26.)

2. **Press and hold the release latch** at the top of the Cellular Cassette.

3. **Pull the Cellular Cassette upward**, and then remove it from the phone.

4. **Insert the bottom end** of the battery compartment cover into the slots at the end of the compartment.

5. **Snap the cover down** into place.

If your phone was powered on when you removed your Cellular Cassette, you will see Cassette Removed in your display for a few moments.
Read this chapter to learn how to get up and running with your new satellite phone.

The phone features available to you vary depending on whether your phone is operating in satellite mode or cellular mode. The table below shows the features available in each mode. See “Selecting a Mode” on page 185 for more information on changing modes.

</table>

1 You must set up this feature first in the Phone Setup Menu.
Startup Procedures

**Turn the Power On and Off**

1. **Insert your SIM card** if necessary. (See “Installing/Removing the SIM Card” on page 28.)

2. **Press and hold** (to turn the phone on and off.

3. If your SIM card is PIN-code protected, **enter the SIM card PIN code** (a four- to eight-digit number given to you by your service provider), and then press (to continue.

   **Caution:** If you enter an incorrect SIM card PIN code three times in a row, your SIM card will be disabled. See “Protecting the SIM Card” on pages 157-158 for more information.

When you turn your phone’s power on, you will hear the wakeup tone (or feel a vibration if the VibraCall® alert function is activated) and see the wakeup screen. The wakeup screen displays a short animated sequence that reminds you to rotate and extend the antenna, and shows how to hold the phone for best reception (see illustration). You may see a number of other power-on messages (described on pages 43-44).

When the (no service) indicator disappears and the (home system) indicator appears, you are ready to make a call.
**Power-On Messages**

Once your phone is powered on, you may see:

<table>
<thead>
<tr>
<th>Message</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Searching...</td>
<td>The phone is attempting to establish communications with the satellite or cellular network. See “Accessing the Network” on page 177.</td>
</tr>
<tr>
<td>Rotate and Extend Antenna</td>
<td>You also hear a tone when you see this message. Make sure the antenna is rotated upward and fully extended and has a clear unobstructed view of the sky.</td>
</tr>
<tr>
<td>Rotate Antenna Registering... or Registering...</td>
<td>Your phone is registering with the network. When the process is complete, you will see Registered. See “Accessing the Network” on page 177.</td>
</tr>
<tr>
<td>Check Signal</td>
<td>Your phone is unable to establish registration with the satellite network. Move to a location with a clear unobstructed view of the sky.</td>
</tr>
<tr>
<td>Invalid Account</td>
<td>Contact your service provider.</td>
</tr>
<tr>
<td>Enter Phone Unlock Code</td>
<td>Your phone was locked after the last use. Enter your four-digit unlock code and press ( \text{OK} ) to proceed. See “Locking and Unlocking Your Phone” on page 154.</td>
</tr>
<tr>
<td>Enter PIN</td>
<td>Enter the four- to eight-digit SIM card PIN code provided by your service provider and press ( \text{OK} ) to proceed. See “Protecting the SIM Card” on page 157.</td>
</tr>
<tr>
<td>Insert Card</td>
<td>Power off your phone, make sure your SIM card is inserted completely, and then power your phone on again.</td>
</tr>
<tr>
<td>Check Card</td>
<td>The SIM card is damaged or inserted the wrong way.</td>
</tr>
</tbody>
</table>
### Holding the Phone

1. **Rotate the antenna** to either the left or right detent. The antenna will stop here.

<table>
<thead>
<tr>
<th>Message</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Blocked</td>
<td>If the SIM card PIN code is incorrectly entered three times in a row, your SIM card becomes blocked. See “Unblock the PIN Code” on page 158 for instructions on how to unblock it.</td>
</tr>
<tr>
<td>! Blocked</td>
<td>If the SIM card PIN2 code is incorrectly entered three times in a row, your SIM card becomes blocked. See “Unblock the PIN2 Code” on page 160 for instructions on how to unblock it.</td>
</tr>
<tr>
<td>Bad Card</td>
<td>Your SIM card has been damaged or incorrectly issued. Contact your service provider for information.</td>
</tr>
</tbody>
</table>
2. **Extend the antenna** by pulling out on the end of it.

The antenna should be vertical to the ground when you talk on the phone (as shown in the following illustration from the wakeup screen animated sequence).

3. Make sure the antenna has a clear unobstructed view of the sky.

**Standby Mode**

To conserve energy, your phone may turn off its display backlight when you have not pressed a key for several seconds. The light reappears the next time you press a key.
Placing a Call

To place a call, your phone must be powered on, have a SIM card inserted, be unlocked, and be in contact with the satellite or cellular network (depending on your mode). See “Accessing the Network” on page 177 for network information.

You can enter a phone number up to a maximum of 20 digits. The digits are displayed in two rows, 16 digits in the top line and four digits in the next line.

Dial a Number

1. **Rotate and fully extend** the satellite antenna if you are in satellite mode. See “Holding the Phone” on page 44.

2. **Enter the number** using the digit keys. As you begin entering digits, you will see Call?.

   When you are in satellite mode, you must enter the phone number in international format:
   
   [international access code, 00, or +]
   [country code or Iridium code]
   [phone number]

   **Note:** If you are calling another Iridium satellite subscriber, use the Iridium code instead of the country code.

3. **Press** . You will see Calling followed by the number you dialed.

   You will see either the flashing message Calling or the flashing messages Calling, Registering..., and the phone will play a series of setup tones.

   If the call connects and is answered, Connected appears on the display for a few seconds, followed by End Call?.
If the call does not connect, you may see one of the following messages:

<table>
<thead>
<tr>
<th>Message</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rotate and Extend Antenna</td>
<td>Make sure the antenna is rotated upward and fully extended and has a clear unobstructed view of the sky.</td>
</tr>
<tr>
<td>Busy Try Later or Please Try Later</td>
<td>The phone is unable to access the network. Try again in a few minutes.</td>
</tr>
<tr>
<td>Restricted Area</td>
<td>The phone is unable to access the network. Move to an area where calls are allowed.</td>
</tr>
<tr>
<td>Redial?</td>
<td>Press OK to redial the number automatically. See “Automatic Redial” on page 48 for more information.</td>
</tr>
</tbody>
</table>

**International Dialing**

To make an international phone call:

1. **Press and hold 0+.**
   
   After a few seconds the international dialing prefix + appears in the display. This allows you to call from any country without knowing the local international access code.

2. **Enter the country code** followed by the phone number. The country code follows the conventional format.

**Note:** If you are in TDMA or CDMA cellular mode, you must set up the international dialing prefix in order for this feature to work. See “Set Up an International Prefix” on page 172 for more information.
**Automatic Redial**

If the number or your network is busy, you will see Redial? for five seconds.

Press ✈️ to redial the number automatically.

**Note:** Your phone makes a maximum of ten redial attempts. If the call cannot be connected within this maximum, you will see the message Redial Failed.

**Satellite Mode**

This feature is not available in cellular mode.

**Redial Last Number Called**

Whenever your phone is on standby, you can redial the last number called:

1. Press ✈️ to display the last number dialed.
2. Press ✈️ again to place the call.

**Dial Special Characters**

You can insert special characters in your numbers:

<table>
<thead>
<tr>
<th>To enter...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>Press ✈️.</td>
</tr>
<tr>
<td>*</td>
<td>Press ✈️.</td>
</tr>
<tr>
<td>† (for international calls)</td>
<td>Press and hold ✈️.</td>
</tr>
<tr>
<td>† (for pause dialing)</td>
<td>Press and hold ✈️.</td>
</tr>
<tr>
<td>supplementary service numbers, PINs, and unblocking</td>
<td>Press # or ✈️ one or more times as necessary.</td>
</tr>
</tbody>
</table>

**Dial a Number With Pauses**

See “Using Pauses in Numbers” on page 84 for information on dialing numbers with pauses.
Dial a Number from the Phone Book

Your phone contains a phone book that you can use to store names and telephone numbers. Once you have stored information in your phone book, you can save dialing steps by:

- using one-touch dialing (page 101)
- recalling and dialing an entry by location (page 88)
- recalling and dialing an entry by name (page 87)
- recalling and dialing one of the last ten numbers called (page 97)

See “Managing the Phone Book” on page 75 for information on how to store and retrieve names and numbers from the phone book.

Make an Emergency Call

You can make an emergency call virtually anywhere in the world (without unlocking your phone) by dialing 112. Provided your phone has found a network, you are able to make an emergency call. The emergency call is directed to a central emergency operator.

To make an emergency call:

Dial 1 1 2.

You will see the message Emergency Calling.

In addition, your Iridium service provider may have provided an additional emergency calling code on your SIM card. Check with your service provider.

Note: If you are in TDMA or CDMA cellular mode, you may have to set up the emergency number in order for this feature to work. See “Set Up the Emergency Number” on page 171 for more information.
**Call a Number in a Message**

For details on how to call a phone number embedded in a message, see “Return a Call” on page 135.

**Cellular Mode**

This feature is not available in cellular mode.

**End a Call**

Use one of the following procedures to end a call:

- Press OK when you see the End Call? prompt in the display.
- Press C.
Receiving a Call

Receive a Phone Call

To receive a call, your phone must be powered on, have a SIM card inserted, be unlocked, and be in contact with the satellite or cellular network (depending on your mode). See “Accessing the Network” on page 177 for network information.

There are two scenarios for receiving calls in satellite mode, depending on the antenna position: (1) antenna raised and fully extended, or (2) antenna stowed or in the down position.

Antenna Raised and Fully Extended

When you receive a call:

- Your phone rings and/or vibrates.
- The status indicator alternates red and green.
- The phone displays Call, followed by Answer? on the next line.

To answer the call:

**Tip:** See page 153 to set your phone’s alert.

Press OK or any digit key (1 - 9, *, or #).

You will see Connected.

If the call does not connect properly, you may see one of the following messages:

<table>
<thead>
<tr>
<th>Message</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Orient Antenna Call Attempt</td>
<td>You need to fully extend the antenna upwards with a clear unobstructed view of the sky.</td>
</tr>
<tr>
<td>Call Failed</td>
<td>The antenna is not properly adjusted or the network signal is not strong enough.</td>
</tr>
</tbody>
</table>
**Antenna Stowed or in the Down Position**

When you receive a call:

- The phone chirps up to three times to alert you of an incoming call.
- The phone displays Rotate Antenna, followed by Call Attempt on the next line.

You must rotate and extend the antenna as quickly as possible to receive the call.

Rotate and fully extend the antenna as described in “Placing a Call” on page 46.

You will see Iridium Call Attempt. Do not attempt to answer until the phone rings or vibrates.

After several seconds, your phone will ring or vibrate and display Call followed by Answer? on the next line.

To answer the call:

**Press OK or any digit key (1 - 9, *, #).**

You will see Connected.

If the call does not connect properly, you may see one of the following messages:

<table>
<thead>
<tr>
<th>Message</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Orient Antenna Call Attempt or Rotate Antenna Call Attempt</td>
<td>You need to fully extend the antenna upwards with a clear unobstructed view of the sky.</td>
</tr>
<tr>
<td>Call Failed</td>
<td>The antenna is not properly adjusted or the network signal is not strong enough.</td>
</tr>
</tbody>
</table>
End a Call

Use one of the following procedures to end a call:

- Press OK when you see the End Call? prompt in the display.
- Press .

Unanswered Calls

If you are away from your phone or choose not to answer a call, your phone displays the message Unanswered Call.

This feature is not available in cellular mode.

Personal Mailbox

Callers who are unable to reach you can leave numeric, text, and voice messages. The next time you register with the satellite network or GSM cellular network (depending on your mode), you will receive these messages. Then you will have the option of returning the call or saving the message for later viewing.

For information on retrieving messages, see “Accessing Received Messages” on page 132.

This feature is not available in TDMA or CDMA cellular mode.
Additional Phone Features

Lock and Unlock the Keypad

To prevent accidental usage of the phone, press the # and * keys simultaneously to lock the keypad. All keys with the exception of the # key are disabled. You can still answer an incoming call by pressing # when the keypad is locked.

To remove the keypad lock, press # and * simultaneously.

Adjust Earpiece Volume

To adjust earpiece volume:

- **Increase the volume** by pressing the upper volume control key.
- **Decrease the volume** by pressing the lower volume control key.

As you press the keys, the phone’s speaker demonstrates the new volume level. The bar graph in the display represents the volume level. The higher the graph, the louder the volume.

![Volume Graph]

**Note:** You can also use the volume control keys to scroll through phone book entries. See page 87 for more information.

Tip: The volume control keys are located on the side of the phone.
**Adjust Ringer Volume**

To adjust the ringer volume:

Press [vol] and then the up or down volume control key.

The phone sounds the new volume level as you adjust it.

**Note:** You can also use the Phone Setup menu to adjust ringer volume. See page 152 for more information.

**View Your SIM Card Phone Number**

To retrieve and view your phone number from your SIM card:

Press [vol] [0] [0].

**Notes:**

- If you do not see your phone number, the number has not been programmed onto your SIM card. You can program your phone number onto your SIM card by following the steps described in “Modify Your Phone Number(s)” on page 100.
- You can also use the Phone Book menu to view your phone number. See page 99 for more information.

**Tip:** The volume control keys are located on the left side of the phone.
Using In-Call Features

Read this chapter to learn how to use In-Call menu features. The In-Call menu is displayed when you press \( \text{M} \) during a call. See “Using the In-Call Menu” on page 72 for more information.

The feature selection on the In-Call menu varies depending on your mode setting. The table below shows the features available in each mode. See “Selecting a Mode” on page 185 for more information on changing modes.

<table>
<thead>
<tr>

</table>

1. Your service provider may offer similar or additional features.
2. This feature must be activated from the Quick Access menu in this cellular mode.
For privacy during a call, try muting the phone. You hear the party on the other end, but the other party does not hear you.

To mute a call in progress:

1. Press \(\text{Menu}\) until you see Turn Mute on or off.
2. Press \(\text{Ok}\) to select. You will see Mute followed by End Call? on the next line.

Caution: You cannot press \(\text{Ok}\) a second time to unmute the phone. If you press \(\text{Ok}\) when the phone is muted, you will end the call.

To unmute a call:

1. Press \(\text{Menu}\) until you see Turn Mute on or off.
2. Press \(\text{Ok}\) to select.

The In-Call menu is not available in these cellular modes. You must activate call muting from the Quick Access menu in these cellular modes.

To mute a call in progress:

1. Press \(\text{Up}\).
2. Press \(\text{Menu}\) to scroll to Mute, then press \(\text{Ok}\) to select.

To unmute a call:

1. Press \(\text{Up}\).
2. Press \(\text{Menu}\) to scroll to Mute, then press \(\text{Ok}\) to select.
Using Call Waiting

**Note:** You must subscribe to this network feature through your service provider. Contact your service provider for additional information.

If you have subscribed to Call Waiting, you must first activate it through the Options menu. (See “Activating Call Waiting” on page 116.) After you activate it, you are notified of incoming calls while you are on the line in two ways. When a call comes in, you hear a beep and see the message Call Waiting followed by Answer?.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>accept the waiting call</td>
<td>Press OK . Your current call is placed on hold.</td>
</tr>
<tr>
<td>reject the waiting call</td>
<td>Press C .</td>
</tr>
<tr>
<td>end current call before answering</td>
<td>1. Press M . You will see End Active Call.</td>
</tr>
<tr>
<td>the waiting call</td>
<td>2. Press OK . Your phone rings and can now be answered normally.</td>
</tr>
</tbody>
</table>

You may see one of the following messages during call waiting activities:

<table>
<thead>
<tr>
<th>Message</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Trying</td>
<td>Your phone is attempting to switch between the current and held call.</td>
</tr>
<tr>
<td>Hold Failed</td>
<td>The attempt to hold a call was unsuccessful.</td>
</tr>
<tr>
<td>Cannot Hold Second Call</td>
<td>A call is already on hold. You can only place one call on hold.</td>
</tr>
<tr>
<td>Reconnect Failed</td>
<td>The held call could not be made active again.</td>
</tr>
<tr>
<td>Busy Try Later</td>
<td>Your phone is working on a previous command. Wait a short time before repeating the new command.</td>
</tr>
</tbody>
</table>

This feature is not available in GSM 900 cellular mode.
TDMA and CDMA cellular users who have subscribed to this feature are notified of an incoming call by two beeps. You may see a message in your display, depending on your service provider.

To handle the waiting call, you must send a phone flash along with the appropriate feature code provided by your service provider. The current call is put on hold. To return to your initial call you must send another phone flash. For instructions on how to send a phone flash, see “Sending a Phone Flash” on page 66.
Placing a Call on Hold

Note: You must subscribe to this network feature through your service provider. Contact your service provider for additional information.

You can place a call on hold to receive a new call or while making a new call. You can only place one call on hold at a time, so some options may not be accessible if you have already placed a call on hold.

To place a call on hold:

1. Press \( \text{Menu} \) until you see Hold Call.
2. Press \( \text{OK} \). Your current call is put on hold and you will see Call Holding followed by Reconnect?.

Once your call is on hold, you have these options:

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
</table>
| make a new call   | 1. Press \( \text{Menu} \) until you see Make New Call, and then press \( \text{OK} \) to select.  
2. Dial the number as usual, and then press \( \text{OK} \) to place the call. |
| switch between calls | When you are connected to either number, you will see 2 Calls followed by Switch?. Press \( \text{OK} \) to switch to the other call and automatically place the current call on hold. |
| end both calls    | Press \( \text{Menu} \) until you see End Active & Held Call, and then press \( \text{OK} \) to select. Both calls are disconnected, and the display returns to standby. |
| end current call  | Press \( \text{C} \) at any time. |
You may see one of the following messages:

<table>
<thead>
<tr>
<th>Message</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Trying</td>
<td>Your phone is attempting to switch between the current and held call.</td>
</tr>
<tr>
<td>Hold Failed</td>
<td>The attempt to hold a call was unsuccessful.</td>
</tr>
<tr>
<td>Cannot Hold Second Call</td>
<td>A call is already on hold. You can only place one call on hold.</td>
</tr>
<tr>
<td>Reconnect Failed</td>
<td>The held call could not be made active again.</td>
</tr>
<tr>
<td>Busy Try Later</td>
<td>Your phone is working on a previous command. Wait a short time before repeating the new command.</td>
</tr>
</tbody>
</table>

This feature is not available in GSM 900 cellular mode.

To place a call on hold, you must send a phone flash along with the appropriate feature code provided by your service provider. To return to your initial call, you must send another phone flash. For instructions on how to send a phone flash, see “Sending a Phone Flash” on page 66.
Making a Conference Call

**Note:** You must subscribe to this network feature through your service provider. Contact your service provider for additional information.

This feature lets you participate in a conference call of up to five parties.

To make a conference call, you must be engaged in an active call and have another call on hold. You can do this by accepting a waiting incoming call during an active call, or by placing an active call on hold and making a second call.

To begin a conference call:

1. **Press** menu until you see Conference Call.
2. **Press** OK. Your phone joins your current call with your held call, and you will see Conference followed by End Call?

While in a conference call, you have these options:

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
</table>
| place the active call on hold | **Press** menu until you see Hold Call, and then **press** OK to select. Your current call is put on hold and you will see Call Holding followed by Reconnect?.

| | 1. **Press** menu until you see Make New Call, and then **press** OK to select.
| | 2. **Dial the number** as usual, and then **press** OK to place the call.
| make a new call | If you want to add the new party to the conference call, repeat steps 1 and 2 for beginning a conference call as described above. |
You may see one of the following messages:

<table>
<thead>
<tr>
<th>Message</th>
<th>Description</th>
</tr>
</thead>
</table>
| Conference Unsuccessful  | One of your calls is already engaged in a conference call controlled by a remote party  
|                          | **or**                                                                     |
|                          | The attempt to join the held call and the active call was unsuccessful.      |
| Conference Full          | You already have the maximum number of five callers joined in a conference call. |
| Split Call Unsuccessful  | You already have an active call and a call on hold  
|                          | **or**                                                                     |
|                          | The attempt to split the call was unsuccessful.                             |

If you want to... Then...

| Hold a private conversation with one of the conference call participants | 1. Press until you see Split Call, and then press to select. You will see the name of the first party added to the conference call.  
|                                                                         | 2. Press to scroll through the list of call participants until you find the party you want to talk to, then press to select.  
|                                                                         | The selected party becomes the active call, with the other parties placed on hold.  
|                                                                         | To return the private call to the conference call, repeat the steps for making a conference call as described on page 63. |
| End conference call         | Press at any time.                                                          |
**Keypad Controls**

Many conference call features are directly accessible by entering specific key sequences on the keypad during a call:

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>begin a conference call</td>
<td>Press 3 + OK.</td>
</tr>
<tr>
<td>add a single call to a conference call</td>
<td>Press 3 + OK.</td>
</tr>
<tr>
<td>hold a private conversation with one participant</td>
<td>Press 2 + [call number] + OK. (Where [call number] is the sequential order in which the call was placed or received.)</td>
</tr>
<tr>
<td>place active call on hold, accept held or waiting call</td>
<td>Press 2 + OK.</td>
</tr>
<tr>
<td>release a specific conference call participant</td>
<td>Press 1 + [call number] + OK. (Where [call number] is the sequential order in which the call was placed or received.)</td>
</tr>
<tr>
<td>end all held calls (no waiting call)</td>
<td>Press 0 + OK.</td>
</tr>
<tr>
<td>end all active calls, accept held or waiting call</td>
<td>Press 1 + OK.</td>
</tr>
</tbody>
</table>

This feature is not available in GSM cellular mode.

To make a conference call or access conference call options, you must send a phone flash along with the appropriate feature code provided by your service provider. For instructions on how to send a phone flash, see “Sending a Phone Flash” on page 66.
Using In-Call Features

**Sending a Phone Flash**

This feature only applies to TDMA or CDMA cellular mode.

Many TDMA and CDMA cellular network features (for example, call waiting, call holding, call forwarding) require you to send a “phone flash” over the air during a call to access them. This is similar to when you press the switch hook on your conventional phone in your home or office to switch between calls. The phone flash alerts the network that you want to use a particular network feature. Your service provider will provide you with the appropriate codes to send with the phone flash for the features to which you have subscribed.

To send a phone flash:

1. **Press** \( \text{\textup{M}} \) while you are in a call. You will see Flash Options followed by Select?.

2. **Press** \( \text{\textup{O}} \). You will see Send Flash?.

3. **Enter the access code** for the feature you want to access, if necessary, and then press \( \text{\textup{O}} \) to send the flash.

   or

   **Press** \( \text{\textup{C}} \) to cancel the flash.
Using the Menus

Many of your phone’s features are organized into lists of options called menus. There are three menus:

- The main **Options menu** lets you select and/or adjust phone features.
- The **Quick Access menu** gives you instant access to the menu features you use most frequently.
- The **In-Call menu** gives you access to call-related features when you are in a call.

Some options give you access to additional lists of options called submenus.
Using the Options Menu

The Options menu gives you access to your phone’s features and options. You can not access this menu during a call. The submenus that appear under the Options Menu vary depending on your mode setting. See “Selecting a Mode” on page 185 for more information on changing modes.

Navigate the Options Menu

Learning how to use just a few keys enables you to move freely through the entire menu system.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>enter the Options menu</td>
<td><strong>Press</strong> (\text{Menu}). You will see the first available submenu.</td>
</tr>
</tbody>
</table>
| scroll through the Options menu | • **Press** \(\text{Menu}\) to scroll forward.  
• **Press** \(\text{< or >}\) to scroll backward or forward. |
| select options and submenus | **Press** \(\text{OK}\) to select a menu option or submenu when that option or submenu name is displayed. |
| exit features and menus | • **Press** \(\text{C}\) to exit the feature or submenu.  
• **Press and hold** \(\text{C}\) to exit the Options menu. |

**Note:** If you press \(\text{Menu}\) during a call in satellite mode or GSM 900/1800 cellular mode, you will see the In-Call menu, which is described on page 72.
How the Phone Responds

As you scroll through the Options menu, you will see one of three questions on the bottom line of the display.

<table>
<thead>
<tr>
<th>If your phone asks...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>View Options?</td>
<td>Press OK to enter the submenu.</td>
</tr>
<tr>
<td>Select?</td>
<td>Press OK to select the displayed feature.</td>
</tr>
<tr>
<td>Quit?</td>
<td>Press OK to exit the feature.</td>
</tr>
</tbody>
</table>

Display Messages and Indicators

<table>
<thead>
<tr>
<th>If you see...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>✔ Completed</td>
<td>This indicates a feature has been activated.</td>
</tr>
<tr>
<td>🔄 Failed</td>
<td>The display returns to the menu in a few seconds.</td>
</tr>
<tr>
<td>Enter PIN or Enter Name</td>
<td>Enter requested information, then press OK.</td>
</tr>
<tr>
<td>📅 Busy Try Later</td>
<td>You may have requested information while your phone was completing another task.</td>
</tr>
<tr>
<td>📉</td>
<td>The scroll bar indicates where you are in a menu.</td>
</tr>
<tr>
<td>⏲️</td>
<td>Your phone may take a few seconds to request settings from the network.</td>
</tr>
</tbody>
</table>

Customize the Options Menu

To personalize the Options menu—to hide and move features—see “Move Menu Features” on page 200.
Using the Quick Access Menu

The Quick Access menu is a way to keep your favorite menu options readily accessible. Each digit key, 1 to 9, is matched to a Quick Access feature. See the table on page 71 for the default setup.

If you know the number of the feature, activating that option takes only two button presses! If you do not know the number or want to review your options, just scroll through the icon menu and read the tag attached to each option.

Activate the Feature Directly

To access the feature directly:

Press 评选, and then press the digit key of the feature.

Scroll to the Feature

To scroll to the feature:

1. Press 翻页.
2. Press 首菜单 to scroll through the available features.
3. Press 选择 to select a feature.
Default Quick Access Settings

The following features (and associated icons) are the default settings for the Quick Access menu.

<table>
<thead>
<tr>
<th>Key</th>
<th>Icon</th>
<th>Quick Access Feature</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>📖</td>
<td><strong>Find Name</strong> searches your phone book by the full name.</td>
</tr>
<tr>
<td>2</td>
<td>🎤</td>
<td><strong>Mute</strong> mutes and unmutes a call in progress.</td>
</tr>
<tr>
<td>3</td>
<td>📨</td>
<td><strong>Call Voicemail</strong> calls your voicemail number to check your voicemail.</td>
</tr>
<tr>
<td>4</td>
<td>🌋</td>
<td><strong>Battery Meter</strong> displays a fuel gauge indicating charge. The more bars, the greater the charge.</td>
</tr>
<tr>
<td>5</td>
<td>🗝</td>
<td><strong>Lock Now</strong> locks your phone immediately.</td>
</tr>
<tr>
<td>6</td>
<td>🎨</td>
<td><strong>Vibrate On/off</strong> activates or deactivates the VibraCall® alert function.</td>
</tr>
<tr>
<td>7</td>
<td>📄</td>
<td><strong>Read Messages</strong> displays the newest message received.</td>
</tr>
<tr>
<td>8</td>
<td>🌡️</td>
<td><strong>Register Now</strong> initiates a search for the Iridium satellite network. You must wait three minutes between registration attempts.</td>
</tr>
<tr>
<td>9</td>
<td>⏯️</td>
<td><strong>Forward On/Off</strong> activates or deactivates unconditional call forwarding depending on the current setting.</td>
</tr>
</tbody>
</table>

1 You must subscribe to this network feature through your service provider. Contact your service provider for additional information.

Customize the Quick Access Menu

See “Personalizing the Quick Access Menu” on page 202 for instructions on how to modify the feature selection on the Quick Access menu.
Using the In-Call Menu

This menu lets you access specific features while you are in a call. The In-Call menu is only available when you are in a call. You cannot review it off-line.

**Entering the In-Call Menu**

While you are in a call:

- Press **menu** to view the In-Call menu features.

**In-Call Menu Features**

The In-Call menu dynamically changes depending on the type of call you are in and the mode you have selected.

The following options appear on the In-Call menu in satellite mode.

<table>
<thead>
<tr>
<th>Type of call</th>
<th>Options</th>
</tr>
</thead>
<tbody>
<tr>
<td>single active call</td>
<td>Hold Call</td>
</tr>

</tbody>
</table>

This menu is not available in GSM 900 cellular mode.

When you press 📞 during a call in TDMA or CDMA cellular mode, you will see Flash Options followed by Select?.
Managing the Phone Book

Your satellite phone can store up to 100 names and numbers, and your SIM card expands memory capacity even more.

You can use the dedicated keys or the Phone Book menu to add and retrieve numbers from the phone book. With the Phone Book menu you can also access phone book maintenance and security features.

The feature selection on the Phone Book menu varies depending on your mode setting. The table below shows the features available in each mode. See “Selecting a Mode” on page 185 for more information on changing modes.

<table>

Organizing Your Phone Book

Each name and phone number in your phone book is stored in a numbered memory location. The satellite phone has two types of memory—phone memory and SIM card memory.

<table>
<thead>
<tr>
<th></th>
<th>Phone Memory</th>
<th>SIM Card Memory¹</th>
</tr>
</thead>
<tbody>
<tr>
<td>Personal Numbers</td>
<td>100 entries</td>
<td>155 entries</td>
</tr>
<tr>
<td>Fixed Dial Numbers</td>
<td>No entries</td>
<td>40 entries</td>
</tr>
<tr>
<td>Phone Number Digits</td>
<td>32</td>
<td>20</td>
</tr>
<tr>
<td>Name Characters</td>
<td>16</td>
<td>16</td>
</tr>
<tr>
<td>Location Numbers</td>
<td>1-100</td>
<td>101-255</td>
</tr>
</tbody>
</table>

¹ SIM card capacity varies depending upon the card issued by your service provider.

Your phone’s memory can seem overwhelming if you do not have a strategy for organizing your phone book. Begin setting up your phone book by asking yourself three questions:

**Which numbers do I call most?**

Make a list of the numbers you call most frequently. You will probably want to store these numbers in the first nine memory locations of your phone book. You can then dial them with a single keystroke by using one-touch dialing (satellite mode only).
When do I use these numbers?

Group the numbers on the list according to when you use them. Most people call a different set of numbers during the day than they do in the evening and on weekends. You can switch one-touch dialing to your phone’s memory (locations 1–9), your SIM card’s memory (locations 101–109), or to your fixed dial list (locations 1–9). Store your evening and weekend numbers on one type of memory and your daytime numbers on another.

Which numbers do I need to keep secure?

Use your SIM card to store the numbers you need to keep secure, like the numbers of friends and family members. You can remove your SIM card and keep it securely in your wallet or purse when you are not using your phone. If you wish, you can even require a PIN code every time your SIM card is inserted into any phone. (To deactivate your PIN code, see “Activate and Deactivate the SIM Card PIN Code” on page 157.) Store more public numbers, like business associates and travel agents in your phone’s memory.

Tip: If you have many entries, group them in blocks of ten to make them easier to find.
Storing Names and Numbers

Add an Entry

Use the Options Menu

1. Follow the steps in “Getting to Personal Numbers...” to get to Add Entry, and then press OK.
2. Press MENU to scroll to Add To Phone Memory or Add To SIM Card Memory.
3. Press OK to select. You will see Enter Number.
4. Enter a number, and then press OK. You will see Enter Name.
5. Enter a name (as described in “Entering Names” on page 82), and then press OK. You will see Enter Location.
6. Enter a one-, two-, or three-digit location number (1-100 for phone memory or 101-255 for SIM memory*), and then press OK. You will see Stored XXX.
   or
   Press OK to select the next available location. You will see Stored XXX.
7. Press and hold C to exit the menu.

Tip: When in satellite mode, numbers should be entered in international format.

* SIM memory is dependent on your SIM card.
Use the Dedicated Keys

1. Enter the phone number you want to store.

2. Press to begin storing.

3. Press to scroll to Add To Phone Memory or Add To SIM Card Memory, and then press . You will see Enter Number, followed by the number you entered.

4. Press to accept the number. You will see Enter Name.

5. Enter a name (as described in “Entering Names” on page 82), and then press . You will see Enter Location.

6. Enter a one-, two-, or three-digit location number, and then press . You will see Stored XXX.

or

Press to store the entry in the next empty memory location. You will see Stored XXX.

Adding Entry Messages

When you enter the location number for your entry, you may see one of these messages:

<table>
<thead>
<tr>
<th>Message</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stored XXX</td>
<td>You have stored the entry.</td>
</tr>
<tr>
<td>Range XXX-XX</td>
<td>You have chosen a memory location outside the appropriate range. Enter a new number within the range listed on the display.</td>
</tr>
<tr>
<td>Overwrite?</td>

</tbody>
</table>
**Entering Names**

You can use the keypad to produce any letter in the alphabet. For example, press 2 to enter the letters A, B, or C, as shown:

Tip: Press and hold any numeric key to toggle between uppercase and lowercase characters.

**Enter Characters**

1. **Enter a letter** by pressing a key as many times as necessary.
2. Press ▲ to advance the cursor.
3. Repeat steps 1 and 2 as many times as necessary, and then press OK.

**Correct an Entry**

To **delete** a character:

1. Press ▲ to scroll the cursor to the right of the character you want to delete.
2. Press ▼ to delete one character at a time.
   or
   Press and hold ▼ to clear the display.

To **add** a character:

1. Press ▼ to scroll the cursor to the location where you want to add a character.
2. **Enter a letter** by pressing a key as many times as necessary.
**Available Characters**

Use this chart as a guide for producing characters:

1. Space . 1 ? ! , @ _ & : ” ( ) ’ % £ $ 
2. A B C 2 Ä Å à Æ β Ć 
3. D E F 3 Δ É è Æ φ 
4. G H I 4 Γ ι 
5. J K L 5 Λ 
6. M N O 6 Ñ Ö ø Ó Ω 
7. P Q R S 7 Π β Σ 
8. T U V 8 Θ Ü ū 
9. W X Y Z 9 Ξ Ψ 
0. + - 0 x * / = > < #

The upper line for each key shows the uppercase characters. The lower line for each key shows the lowercase characters.
When you call automated systems, a recorded message prompts you for numbers such as PIN numbers and account numbers. You can store these numbers in the same memory location as the automated system’s access number. Separate the numbers with “pauses”—special characters that tell your phone to wait a few seconds before sending additional numbers—and store the string in the same way you would other numbers.

**Enter Pauses in Numbers**

1. **Enter the phone number** you use to access the automated system.
2. **Press and hold** [*]. You will see a ¨ (pause) character inserted into the number entry.
3. **Enter the next group of numbers**. For example, enter your PIN number. If the automated system requires a * or #, enter those symbols, too.
4. **Repeat steps 2 to 3** as many times as necessary.
5. **To store the entry** follow the procedures in “Add an Entry” on page 80.

**Tip:** You can store 32 characters in a phone memory location, or 20 characters in a SIM card memory location. A pause is equal to one character.
Dial Numbers With Pauses

To dial a number with pauses in satellite mode or GSM cellular mode:

1. **Recall the entry.** (See “Locating Entries” on page 87.)
2. **Press  to place the call.**
   The first pause in the number waits until the call is answered. When the automated system answers, your phone waits a few seconds and then automatically sends the next set of numbers, then the next, until all numbers are sent.

To dial a number with pauses in TDMA or CDMA cellular mode:

1. **Recall the entry.** (See “Locating Entries” on page 87.)
2. **Press  to place the call.**
   The first pause in the number waits until the call is answered.
   The phone then waits for you to send the next set of numbers, You will see Send Digits?.
3. **Press  to send the next set of digits.**
4. **Repeat step 3** until all the digit sequences are sent.
Using Phone Number Prefixes

**Satellite Mode**

You can save time when you dial by storing the prefixes that you often use. This is sometimes called “postscripting.” Your satellite phone allows you to change or add to phone book entries without overwriting them.

Store a prefix in your phone book just as you would any other number. See “Storing Names and Numbers” on page 80.

**Use a Stored Prefix**

To use a stored prefix:

1. **Recall the prefix** from your phone book. (See “Locating Entries” on page 87.)
2. **Add** the remaining numbers.
3. **Press** to place the call.

**Change Entry to a Similar Number**

To change an entry to a similar number:

1. **Recall the number** from your phone book. (See “Locating Entries” on page 87.)
2. **Press** to delete the unwanted digits.
3. **Enter** the replacement digits.
4. **Press** to place the call.

**Cellular Mode**

This feature is not available in cellular mode.
Locating Entries

Find an Entry by Name

Search your phone book by the first few letters of the entry.

Note: If you have restricted access to either SIM card or phone memory and you are in satellite mode, those entries will not be available. For more information, see “Preventing Access to the Phone Book” on page 91.

1. Follow the steps in “Getting to Personal Numbers...” to get to Find Entry By Name, and then press OK to select. You will see Enter Name.

2. Enter one or more characters of the entry, and then press OK. If necessary, scroll to the entry you are looking for.

3. Press OK to access options for that entry, and then proceed to “Calling, Modifying, or Erasing an Entry” on page 89.

Tip: Your phone sorts SIM card memory and phone memory together alphabetically.

Tip: Use the volume control keys to scroll through phone book entries.
Finding an Entry by Location

Find an entry by its location number.

**Use the Options Menu**

1. **Follow the steps in** “Getting to Personal Numbers...” to get to Find Entry By Location, and then **press OK** to select. You will see Enter Location.

2. **Enter the one-, two-, or three-digit location number**, and then **press OK**. You will see the entry displayed.

   If you enter an empty location number, you will see Location XXX is Empty. Your phone then selects the next available location. If no numbers are stored, you will see No Numbers Stored.

3. **Press OK** to access options for that entry, and then proceed to “Calling, Modifying, or Erasing an Entry” on page 89.

**Use the Dedicated Keys**

1. **Press OK**. You will see Enter Location.

2. **Enter the one-, two-, or three-digit location number** of the entry, and then **press OK**. You will see the entry displayed.

   If you enter an empty location number, you will see Location XXX is Empty. Your phone then selects the next available location.

3. **Press OK** to call the displayed entry. You will see the number followed by Calling.
Calling, Modifying, or Erasing an Entry

Once you have selected a phone book entry, you can call, change, or erase that entry.

Call a Selected Entry

1. Find an entry, and then press OK. (See “Locating Entries” on page 87.)

2. Press until you see Call Number, and then press OK. You will see Calling followed by the number you dialed.

Modify a Name or Number

1. Find an entry, and then press OK. (See “Locating Entries” on page 87.)

2. Press until you see Modify Name Or Number, and then press OK. You will see Edit Number, followed by the phone number stored in that entry.

3. Enter changes to the number, and then press OK. You will see the name stored in that entry.

4. Enter changes to the name, and then press OK. You will see Modified XXX.

Erase a Name and Number

1. Find an entry, and then press OK. (See “Locating Entries” on page 87.)

2. Press until you see Erase Name And Number, and then press OK. You will see Erased XXX.

Tip: For help entering letters or changing entries, see “Entering Names” on page 82.
Getting to Personal Numbers...

1. Press \text{\textasciitilde \textasciitilde} until you see \textit{Phone Book}, and then press \hbox{\textbf{OK}}.
2. Press \hbox{\textbf{\textasciitilde \textasciitilde}} to scroll to \textit{Personal Numbers}, and then press \hbox{\textbf{OK}}.
3. Press \hbox{\textbf{\textasciitilde \textasciitilde}} to scroll to one of the features described below.

\textbf{Checking Phone Book Capacity}

\textbf{Satellite Mode}

Use this feature to see how many available memory locations you have in either SIM card memory or phone memory.

1. \textbf{Follow the steps} in “Getting to Personal Numbers...” to get to \textit{Check Capacity}, and then press \hbox{\textbf{OK}} to select.
2. Press \hbox{\textbf{\textasciitilde \textasciitilde}} until you see \textit{Check Phone Capacity} or \textit{Check SIM Capacity}, and then press \hbox{\textbf{OK}}. You will see \textit{XXX Unused Locations}.
3. Press and hold \hbox{\textbf{\textasciitilde \textasciitilde}} to exit the menu.

\textbf{Cellular Mode}

This feature is not available in cellular mode.
Preventing Access to the Phone Book

You may want to restrict memory access when loaning your phone to others. You can choose to prevent access to the phone memory, SIM memory, or both.

**Caution:** If you switch to cellular mode these restrictions will not apply.

1. **Follow the steps in** “Getting to Personal Numbers...” to get to Prevent Access, and then press **ok** to select.

2. **Press** **menu** until you see the restriction type you desire: No Memory Restrictions, To Phone Memory, To SIM Card Memory, or To Phone & SIM Memory.

3. **Press** **ok** to select the displayed option. You will see Enter Security Code.

4. **Enter security code.** Enter your six-digit security code. You will see Completed.

5. **Press and hold** **c** to exit the menu.

**Note:** If you restrict access to either phone memory or SIM memory and try to access an entry stored in that type of memory, you will see a list of the entries that are not restricted. If you prevent access to both your phone memory and SIM memory and then try to access an entry, you will see Restricted.

This feature is not available in cellular mode. When you switch to cellular mode, the restrictions you set in satellite mode will not apply.
Managing the Phone Book

Restricting Phone Use

You can restrict calling on your phone to a list of numbers that you create. When the fixed dialing feature is active, you can only call numbers or use prefixes (for example, country codes or area codes) that exactly match those stored in your fixed dial list. You can store up to 40 entries on your list. These entries are stored on your SIM card.

Activate Fixed Dialing

Use this feature to activate fixed dialing. For instructions on how to store entries in the fixed dial list, see “Add an Entry” on page 93.

Note: The fixed dialing feature restricts access to your SIM memory.

1. Follow the steps in “Getting to Fixed Dialing...” to get to Setup Fixed Dialing, and then press OK to select. You will see Enter PIN2.
2. Enter code. Enter your SIM card PIN2 code, and then press OK.
3. Press until you see On or Off, and then press OK. You will see Completed.
4. Press and hold to exit the menu.

Satellite Mode

Tip: You should have received your SIM card PIN2 code from your service provider.

Cellular Mode

This feature is not available in cellular mode. You must deactivate the fixed dialing feature from satellite mode in order to make and receive calls in cellular mode.
Add an Entry

To add an entry to the fixed dial list:

1. **Follow the steps in** “Getting to Fixed Dialing...” **to get to** Setup Fixed Dialing, and then **press OK** **to select.** You will see Enter PIN2.

2. **Enter code.** Enter your SIM card PIN2 code, and then **press OK**.

3. **Press** until you see Add Entry, and then **press OK**. You will see Enter Number.

4. **Enter the number,** and then **press OK**. You will see Enter Name.

5. **Enter the name,** and then **press OK**. You will see Enter Location.

6. **Enter a location number,** and then **press OK**. You will see Completed.

7. **Press and hold** to exit the menu.

This feature is not available in cellular mode. You must deactivate the fixed dialing feature from satellite mode in order to make and receive calls in cellular mode.

---

**Satellite Mode**

**Tip:** Phone numbers must be in international format.

**Cellular Mode**

**Tip:** See “Entering Names” on page 82 for help entering letters.
Managing the Phone Book

**Satellite Mode**

To erase an entry in the fixed dial list:

1. **Follow the steps in** “Getting to Fixed Dialing...” **to get to Setup Fixed Dialing**, and then **press OK** to select. You will see Enter PIN2.
2. **Enter code**. Enter your SIM card PIN2 code, and then **press OK**.
3. **Press** until you see Erase Entry, and then **press OK** to select. You will see the first entry in your fixed dial list.
4. **Press** to scroll to the number you wish to erase. You will see Erase?.
5. **Press OK** to confirm. You will see Completed.
6. **Press and hold** to exit the menu.

**Cellular Mode**

This feature is not available in cellular mode. You must deactivate the fixed dialing feature from satellite mode in order to make and receive calls in cellular mode.

**Tip:** You should have received your SIM card PIN2 code from your service provider.

---

**Erase an Entry**

To erase an entry in the fixed dial list:

1. Follow the steps in “Getting to Fixed Dialing...” to get to Setup Fixed Dialing, and then press OK to select. You will see Enter PIN2.
2. Enter code. Enter your SIM card PIN2 code, and then press OK.
3. Press until you see Erase Entry, and then press OK to select. You will see the first entry in your fixed dial list.
4. Press to scroll to the number you wish to erase. You will see Erase?.
5. Press OK to confirm. You will see Completed.
6. Press and hold to exit the menu.
**Edit an Entry**

To edit an entry in the fixed dial list:

1. **Follow the steps in** “Getting to Fixed Dialing...” to get to **Setup Fixed Dialing**, and then **press OK** to select. You will see Enter PIN2.

2. **Enter code.** Enter your SIM card PIN2 code, and then **press OK**.

3. **Press MENU** until you see **Edit Entry**, and then **press OK** to select. You will see the first entry in your fixed dial list.

4. **Press MENU** to scroll to the entry you want to change, and then **press OK**. You will see the current number for that location.

5. **Enter changes** to the number, and then **press OK**. You will see the current name for that location.

6. **Enter changes** to the name, and then **press OK**. You will see the current location.

7. **Enter a new location**, and then **press OK**. You will see **Completed**.

8. **Press and hold C** to exit the menu.

This feature is not available in cellular mode. You must deactivate the fixed dialing feature from satellite mode in order to make and receive calls in cellular mode.

**Satellite Mode**

**Cellular Mode**
**View Your Fixed Dialing List**

This feature enables you to review, but not change, your fixed dial list.

1. **Follow the steps in** “Getting to Fixed Dialing...” to get to View Fixed Dial List, and then **press OK** to select. You will see the first number on your fixed dial list.

2. **Press** to scroll through the numbers on your fixed dial list.

3. **Press and hold** to exit the menu.

**Satellite Mode**

**Cellular Mode**

This feature is not available in cellular mode. You must deactivate the fixed dialing feature from satellite mode in order to make and receive calls in cellular mode.
**Viewing the Last Ten Calls Made or Received**

Your phone saves the last ten phone numbers you have dialed. In cellular mode, your phone also saves the numbers of the last ten calls you have received.

To view the phone numbers of the last ten calls you have made:

1. **Follow the steps in “Getting to Phone Book Features...”** to get to Last Ten Calls, and then press OK to select.

2. **Press** to scroll to Last Calls Made or Erase All Numbers, and then press OK to select.

3. If you select Last Calls Made, press to scroll to the number you are looking for, and then press OK to place a call to that number.

   or

   If you select Erase All Numbers, you will see Completed.

4. **Press and hold** to exit the menu.

**Satellite Mode**

**Tip:** If you want to add a number from Last Ten Calls to your phone book, press when the number is displayed, then follow the steps in “Storing Names and Numbers” on page 80.
Cellular Mode

Tip: If you want to add a number from Last Ten Calls to your phone book, press \( \text{M} \) when the number is displayed, then follow the steps in “Storing Names and Numbers” on page 80.

To view the phone numbers of the last ten calls you have made or received:

1. **Follow the steps in** “Getting to Phone Book Features...” to get to Last Ten Calls, and then press \( \text{OK} \) to select.

2. Press \( \text{M} \) to scroll to Last Calls Received, Last Calls Made, or Erase All Numbers, and then press \( \text{OK} \) to select.

3. If you select Last Calls Received or Last Calls Made, press \( \text{M} \) to scroll to the number you are looking for, and then press \( \text{OK} \) to place a call to that number.

   or

   If you select Erase All Numbers, you will see Completed.

4. **Press and hold** \( \text{C} \) to exit the menu.
Viewing and Modifying Your Phone Numbers

View Your SIM Card Phone Number(s)
You can program up to three phone numbers (such as your voice and data phone numbers) onto your SIM card. Use this feature to view your phone number(s).

1. **Follow the steps in** “Getting to Phone Book Features...” to get to **My Phone Number(s)**.
2. **Press** [OK] to select. You will see your phone’s voice phone number followed by **Modify?**.
3. **Press** [ ] to scroll through your numbers.
4. **Press and hold** [ ] to exit the menu.

**Note:** If you do not see your phone number(s), they have not been programmed onto your SIM card. You can program your voice phone number and other phone numbers onto your SIM card by following the steps described in “Modify Your Phone Number(s)” on page 100.

**Tip:** Pressing [MR] [#] also brings up your phone number.
Modify Your Phone Number(s)

Use this feature to modify or program your voice phone number onto your SIM card. You can also program other phone numbers (for example, a data phone number) onto your SIM card. You can have up to three phone numbers.

1. Follow the steps in “Getting to Phone Book Features...” to get to My Phone Number(s).
2. Press OK to select. You will see your phone’s voice phone number followed by Modify?.
3. Press OK to scroll to the number you want to modify.
4. Press OK to modify the number. You will see Edit Number followed by the number for the selected entry.
5. Enter changes to the number, and then press OK. You will see Edit Name followed by the name for the entry selected.
6. Enter changes to the name (as described in “Entering Names” on page 82) and then press OK. You will see Stored.
7. Press and hold to exit the menu.
Using One-Touch Dialing

One-touch dialing enables you to place calls instantly. You can choose to dial the phone numbers in the first nine memory locations in either your SIM memory, phone memory, or your fixed dial list. You choose which type of memory you want to be active with this feature.

**Note:** You must be in satellite mode to use one-touch dialing. However, while the phone is in cellular mode, you can set the memory type that will be active with one-touch dialing.

**Set Up One-Touch Dialing**

To set the active memory for one-touch dialing:

1. **Follow the steps in** “Getting to Phone Book Features...” to get to One-Touch Dial Setting, and then press **OK** to select.

2. **Press ** to scroll through To Phone Memory, To SIM Card Memory, or To Fixed Dial List, and then press **OK** to select the displayed option. You will see **Completed**.

3. **Press and hold ** to exit the menu.

**Satellite Mode**

**Cellular Mode**

**Note:** When your phone is in cellular mode, you can set either SIM memory or phone memory to be the active memory for one-touch dialing. You cannot activate the fixed dial list memory from this mode.

To set the active memory for one-touch dialing when your phone is in cellular mode:

1. **Follow the steps in** “Getting to Phone Book Features...” to get to One-Touch Dial Setting, and then press **OK** to select.

2. **Press ** to scroll to To Phone Memory or To SIM Card Memory, and then press **OK** to select the displayed option. You will see **Completed**.

3. **Press and hold ** to exit the menu.
Use One-Touch Dialing

To use one-touch dialing:

Press and hold the appropriate digit key.

For example, press and hold 2 to dial the number stored in location 2 of your phone memory, location 2 of your fixed dial list, or 102 of your SIM memory, depending on your setting.

Satellite Mode

Tip: You do not need to press to call the number when you use one-touch dialing.

Cellular Mode

You must be in satellite mode to use one-touch dialing. However, while the phone is in cellular mode, you can set the memory type that will be active with one-touch dialing.
Viewing Service Phone Numbers

This feature provides a read-only list of service phone numbers that are pre-programmed by your service provider. The list resides on the SIM card and allows for call placement only.

1. **Follow the steps in** “Getting to Phone Book Features...” to get to **Show Services**.

2. **Press OK** to select. You will see a list of service phone numbers.

3. **Press M** to scroll to the number you are looking for.

4. **Press OK** to place a call to that number.
   
   or
   
   **Press and hold C** to exit the menu.

**Note:** If you do not see any service dialing number(s), they have not been programmed onto your SIM card. Contact your service provider for more information.

This feature is not available in cellular mode.

**Satellite Mode**

**Cellular Mode**
Using Calling Features

This chapter describes call-related features. Many of these features are network features that you must subscribe to in order to access.

The feature selection on the Call Related Features menu varies depending on your mode setting. The table below shows the features available in each mode. See “Selecting a Mode” on page 185 for more information on changing modes.

1. This feature is network and subscription dependent.
2. This feature is network and subscription dependent. It is available only when the extended menus are activated.
This menu is not available in TDMA or CDMA cellular mode.
**Forwarding Calls When Unavailable**

Use this feature when you are unable to answer your phone calls.

**Note:** You must subscribe to this network feature through your service provider. Contact your service provider for additional information.

**Satellite Mode**

To activate this feature in satellite mode:

1. **Follow the steps in** “Getting to Call Forwarding...” to get to **Forward When Unavailable**, and then **press OK** to select. Your phone takes a moment to request the current setting from the network.

2. **Press** **Menu** to scroll to **On** or **Off**, and then **press OK** to select.
   - If you select **On**, continue with **step 3**.
   - If you select **Off**, continue with **step 5**.

3. **Press** **Menu** to scroll to **Voicemail** or **Other Number**, and then **press OK** to select.
   - If you select **Voicemail**, continue with **step 5**.
   - If you select **Other Number**, then you will see **Enter Number**. Continue with **step 4**.

4. **Enter the number** you want calls forwarded to, and then **press OK**.

5. **Press and hold** **C** to exit the menu.

**Getting to Call Forwarding...**

1. **Press** **Menu** until you see **Call Related Features**, and then **press OK**.
2. **Press** **Menu** to scroll to **Call Forwarding**, and then **press OK**.
3. **Press** **Menu** to scroll to one of the features described below.

**Tip:** If you have not yet stored a voicemail number, go to page 144 to learn how.
To activate this feature in GSM cellular mode:

1. **Follow the steps in** “Getting to Call Forwarding...” to get to Forward When Unavailable, and then press **OK** to select. Your phone takes a moment to request the current setting from the network.

2. **Press ** to scroll to On or Off, and then press **OK** to select.
   - If you select On, you will see Enter Number. Continue with step 3.
   - If you select Off continue with step 4.

3. **Enter the number** you want calls forwarded to, and then press **OK**. You will see Call Forward On.

4. **Press and hold ** to exit the menu.

To activate call forwarding features in TDMA or CDMA cellular mode, you must send a phone flash along with the appropriate feature code provided by your service provider. For instructions on how to send a phone flash, see “Sending a Phone Flash” on page 66.

**(CDMA 1900)**

**(CDMA/AMPS)**
**Forwarding All Your Calls**

This feature forwards all of your calls to the number you choose. Your phone does not ring.

**Note:** You must subscribe to this network feature through your service provider. Contact your service provider for additional information.

**Satellite Mode**

To activate this feature in satellite mode:

1. **Follow the steps in** “Getting to Call Forwarding...” to get to Forward All Calls, and then press **OK** to select. Your phone takes a moment to request the current setting from the network.

2. Press **MENU** to scroll to either On or Off, and then press **OK** to select.
   - If you select On, your phone takes a moment to contact the network and update the setting. You will see Call Forward On. Continue with step 3.
   - If you select Off, continue with step 5.

3. Press **MENU** to scroll to Voicemail or Other Number, and then press **OK** to select.
   - If you select Voicemail, continue with step 5.
   - If you select Other Number, then you will see Enter Number. Continue with step 4.
4. **Enter the number** you want calls forwarded to, and then press **OK**.

5. **Press and hold** ✉ to exit the menu.

To activate this feature in GSM cellular mode:

1. **Follow the steps in** “Getting to Call Forwarding...” to get to **Forward All Calls**, and then press **OK** to select. Your phone takes a moment to request the current setting from the network.

2. **Press** ⏽ to scroll to either **On** or **Off**, and then press **OK** to select.
   - If you select **On**, your phone takes a moment to contact the network and update the setting. You will see **Call Forward On**, followed by **Enter Number**. Continue with step 3.
   - If you select **Off**, continue with step 4.

3. **Enter the number** you want calls forwarded to, and then press **OK**.

4. **Press and hold** ✉ to exit the menu.

To activate call forwarding features in TDMA or CDMA cellular mode, you must send a phone flash along with the appropriate feature code provided by your service provider. For instructions on how to send a phone flash, see “Sending a Phone Flash” on page 66.
Using Detailed Call Forwarding

This feature lets you select the specific situations when you want your calls forwarded. The Forward When Unavailable and Forward All Calls features override the settings you select here.

**Notes:**

- You must subscribe to this network feature through your service provider. Contact your service provider for additional information.
- This feature is available only when the extended menus are activated. See “Activating Extended Menus” on page 161.

**Voice Calls**

To forward voice calls in satellite mode:

1. **Follow the steps in** “Getting to Call Forwarding...” to get to Detailed Forwarding, and then **press OK** to select. Your phone takes a moment to request the current setting from the network.

2. **Press** **MENU** to scroll to Forward Voice Calls, and then **press OK** to select.

3. **Press** **MENU** to scroll to the option you desire: Forward All Voice Calls, If Busy, If No Answer, or If Not Reachable.
4. **Press** OK to select the displayed option. Your phone takes a moment to contact the network and update the setting. You will see Call Forward On.

5. **Press** menu to scroll to either Voicemail or Other Number, and then press OK.
   - If you select Voicemail, continue with step 7.
   - If you select Other Number, then you will see Enter Number. Continue with step 6.

6. **Enter the number** you want calls forwarded to, and then press OK.

7. **Press and hold** ✂ to exit the menu.

**Tip:** If you have not yet stored a voicemail number, go to page 144 to learn how.

---

**Cellular Mode**

(GSM 900/1800)

(GSM 900)

To forward voice calls in GSM cellular mode:

1. **Follow the steps in** “Getting to Call Forwarding...” to get to Detailed Forwarding, and then press OK to select.

2. **Press** menu to scroll to Forward Voice Calls, and then press OK to select. Your phone takes a moment to request the current setting from the network.

3. **Press** menu to scroll to the option you desire: Forward All Voice Calls, If Busy, If No Answer, or If Not Reachable. Your phone takes a moment to contact the network and update the setting. You will see Call Forward On.

4. **Press** OK to select the displayed option.
   - If you select If Busy or If Not Reachable, your calls are automatically forwarded to your Personal Mailbox. Continue with step 6.
   - If you select Forward All Voice Calls or If No Answer, you will see Enter Number. Continue with step 5.
5. **Enter the number** you want calls forwarded to, and then press `. 

6. **Press and hold** 🎤 to exit the menu.

To activate call forwarding features in TDMA or CDMA cellular mode, you must send a phone flash along with the appropriate feature code provided by your service provider. For instructions on how to send a phone flash, see “Sending a Phone Flash” on page 66.
Getting to Call Forwarding...

1. Press \( \text{Menu} \) until you see Call Related Features, and then press \( \text{OK} \).
2. Press \( \text{Menu} \) to scroll to Call Forwarding, and then press \( \text{OK} \).
3. Press \( \text{Menu} \) to scroll to one of the features described below.

Canceling All Forwarding

This feature cancels all call forwarding settings in satellite mode or GSM cellular mode.

Note: You must subscribe to this network feature through your service provider. Contact your service provider for additional information.

1. **Follow the steps in** “Getting to Call Forwarding...” **to get to** Cancel All Forwarding, and then press \( \text{OK} \) **to select.**

   Your phone takes a moment to contact the network and update the setting. You will see Call Forward Off. All call forwarding settings are now set to Off.

2. **Press and hold** \( \text{End} \) **to exit the menu.**

To cancel call forwarding settings in TDMA or CDMA cellular mode, you must send a phone flash along with the appropriate feature code provided by your service provider. For instructions on how to send a phone flash, see “Sending a Phone Flash” on page 66.
Activating Call Waiting

If you subscribe to call waiting, use this feature to specify whether or not you want to be notified of incoming calls while you in a call.

**Note:** You must subscribe to this network feature through your service provider. Contact your service provider for additional information.

1. **Follow the steps in** “Getting to Call Related Features...” to get to Call Waiting, and then press `OK` to select.
2. Press `MENU` to scroll to On or Off, and then press `OK` to select the desired option.
3. Press and hold `C` to exit the menu.

For information on using call waiting, see “Using Call Waiting” on page 59.

You do not have to activate call waiting through the menu system in TDMA or CDMA cellular mode. For information on using call waiting in TDMA or CDMA cellular mode, see “Using Call Waiting” on page 59.
Restricting Calls with Call Barring

You can use call barring to restrict both incoming and outgoing calls. Call barring is useful if you are loaning your phone to others or when you wish to control incoming calls. When you change one of your call barring settings, your phone takes a few seconds to request the setting from the network.

Notes:

- You must subscribe to this network feature through your service provider. Contact your service provider for additional information.

- This feature is available only when the extended menus are activated. See “Activating Extended Menus” on page 161.
Getting to Call Barring...

1. Press \text{Menu} until you see \text{Call Related Features}, and then press \text{OK}.
2. Press \text{Menu} to scroll to \text{Call Barring}, and then press \text{OK}.
3. Press \text{Menu} to scroll to one of the features described below.

\textbf{Bar Outgoing Calls}

This feature enables you to receive incoming calls but prevents outgoing calls.

To bar outgoing calls in satellite mode or GSM cellular mode:

1. \textbf{Follow the steps in} “Getting to Call Barring...” \textbf{to get to Bar Outgoing Calls}, and then press \text{OK} \textbf{to select}.
2. Press \text{Menu} \textbf{to scroll to} \text{Intl Calls, Intl Calls Except Home, All Calls, or Off, and then press \text{OK} \textbf{to select}. You will see Enter Password}.
3. \textbf{Enter your bar password, and then press \text{OK}. You will see Completed}.
4. \textbf{Press and hold \text{Cancel} to exit the menu}.

\textbf{Tip: Your service provider gives you a bar password.}

\textbf{Satellite Mode} (GSM 900/1800) (GSM 900)

\textbf{Cellular Mode} (TDMA 800/1900) (CDMA 1900) (CDMA/AMPS)

\textbf{Note: You cannot bar international calls in satellite mode. However, you can cancel the Bar Outgoing Calls/Intl Calls or Bar Outgoing Calls/Intl Calls Except Home feature in satellite mode if the feature was previously activated in GSM cellular mode.}

This feature is not available in TDMA or CDMA cellular mode.
Bar Incoming Calls

This feature allows you to place calls, but refuses incoming calls. Callers hear a recording telling them that you are unavailable. To be sure not to miss a call, see “Using Detailed Call Forwarding” on page 112.

To bar incoming calls in satellite mode or GSM cellular mode:

1. Follow the steps in “Getting to Call Barring...” to get to Bar Incoming Calls, and then press OK to select.

2. Press MINUS to scroll to When Roaming, All Calls, or Off, and then press OK to select. You will see Enter Password.

3. Enter your bar password, and then press OK. You will see Completed.

4. Press and hold END to exit the menu.

Note: The Bar Incoming Calls/When Roaming feature does not apply in satellite mode. However, you can cancel the Bar Incoming Calls/When Roaming feature in satellite mode if the feature was previously activated in GSM cellular mode.

This feature is not available in TDMA or CDMA cellular mode.
Using Calling Features

Cancel All Barring

To cancel all call barring settings in satellite mode or GSM cellular mode:

1. **Follow the steps in** “Getting to Call Barring...” **to** get to **Cancel All Barring**, and then **press OK** to **select**. You will see **Enter Password**.

2. **Enter your bar password**, and then **press OK**. You will see **Call Barring Off**. All call barring settings are now set to **Off**.

3. **Press and hold ę** to **exit** the menu.

This feature is not available in TDMA or CDMA cellular mode.
**Change Bar Password**

When you subscribe to call barring, your service provider gives you a four-digit bar password. Use this feature to change it to something easy to remember.

1. **Follow the steps in “Getting to Call Barring...” to get to Change Bar Password, and then press OK to select. You will see Enter Password.**

2. **Enter your bar password, and then press OK.** You will see Enter New Password.

3. **Enter the new bar password, and then press OK.**

4. **Enter the new bar password again to confirm, and then press OK.**

5. **Press and hold ‰ to exit the menu.**

This feature is not available in TDMA or CDMA cellular mode.

**Satellite Mode**

**Cellular Mode**

**(GSM 900/1800)**

**(GSM 900)**

**Tip:** If you are changing the password for the first time, use the password supplied by your service provider.

**Cellular Mode**

**(TDMA 800/1900)**

**(CDMA 1900)**

**(CDMA/AMPS)**
Using Calling Features

Getting to Call Related Features...

1. Press \textit{\textbf{Menu}} until you see \textit{Call Related Features}, and then press \textbf{OK}.
2. Press \textbf{Menu} to scroll to one of the features described below.

🌐 Viewing the Battery Meter

\textbf{Satellite Mode}

Use this feature to check the charge level on your battery.

\begin{enumerate}
\item \textbf{Follow the steps in} “Getting to Call Related Features...” to scroll to \textit{Show Battery Meter}, and then press \textbf{OK} to select.
\item You will see the battery meter:
\end{enumerate}

\begin{itemize}
\item Low Charge
\item High Charge
\end{itemize}

You may also see one of the following messages:

\begin{tabular}{|l|l|}
\hline
\textbf{Message} & \textbf{Description} \\
\hline
Not Available & The battery meter doesn’t appear because a battery is not installed. \\
\hline
Charging Battery & The battery is being charged. \\
\hline
Fast Charge Completed & The battery has completed charging. \\
\hline
Invalid Batt. & You have an unapproved battery inserted in your phone. \\
\hline
\end{tabular}

2. \textbf{Press and hold} \textbf{End} to exit.

\textbf{Cellular Mode}

This feature is not available in cellular mode.
**Viewing Signal Strength**

Use this feature to check the strength of the signal that your phone is receiving from the Iridium satellite network.

1. **Follow the steps in** “Getting to Call Related Features...” to get to **Show Signal Strength**.

2. **Press** OK to select. You will see **Checking Signal...**.

   If the antenna is not rotated, you will see **Rotate and Extend Antenna**. Rotate and extend the antenna to continue.

   The signal strength indicator is located in the upper left corner of the display:

   ![signal_strength_indicator]

   Signal strength is sampled every four to five seconds; the indicator shows the average strength for the last three samples. The more segments displayed in the bar graph, the stronger the signal. Five bars indicate full signal strength. The indicator shows the tower icon but no bars when the signal is weak.

3. **Press and hold** ✫ to exit the menu.

   This feature is not available in cellular mode.

---

**Satellite Mode**

**Cellular Mode**
Using Calling Features

Deactivating Pending Call Drop Signal

Satellite Mode
Under rare circumstances, due to system overcapacity or a satellite outage, a satellite may not be available to take your call. When this happens, your phone notifies you with a series of three consecutive tones and displays Pending Call Drop. The tones continue periodically until a new satellite moves into range or the call is dropped.

To activate or deactivate the alert tones:

1. Follow the steps in the “Getting to Call Related Features...” to get to Pending Call Drop, and then press OK to select.
2. Press M to scroll to either On or Off, and then press OK to select.
3. Press and hold C to exit the menu.

Cellular Mode
This feature is not available in cellular mode.
Restricting Your Phone Number ID

This feature is not available in satellite mode.

Note: You must subscribe to this network feature through your service provider. Contact your service provider for additional information.

If your phone number is normally sent with each call (so that a recipient with calling line identification can see your number), select Restrict ID On Next Call to prevent your number from being sent with the next attempted call. If your phone number is normally restricted with each call, select Show ID On Next Call to send your number with the next attempted call.

Your phone reverts to its standard behavior after the call attempt is made.

To send or restrict your phone number on your next call attempt:

1. Follow the steps in the “Getting to Call Related Features...” to get to Restrict My Phone Number, and then press OK to select.

2. Press Menu to scroll to Show ID On Next Call, and then press OK to select.

   or

   Press Menu to scroll to Restrict ID On Next Call, and then press OK to select.

3. Press and hold to exit the menu.

This feature is not available in GSM 900 cellular mode, TDMA cellular mode, or CDMA cellular mode.
**Using Message Services**

You can receive voicemail notification messages, and send and receive numeric and text messages through your Personal Mailbox service—around the world. Wherever you are, you can have instant reference to all your communication.

The feature selection on the Messages menu varies depending on your mode setting. The table below shows the features available in each mode. See “Selecting a Mode” on page 185 for more information on changing modes.

Getting to Message Features...

1. Press ⬆️ to go directly to the Messages menu.
   or
   Press 📌 until you see Messages, and then press OK.
2. Press 🔄 to scroll to one of the features described below.

Checking Your Voicemail

This feature makes checking your voicemail simple.

1. Follow the steps in “Getting to Message Features...” to get to Call Voicemail.

2. Press OK to select. You will see your voicemail number followed by Calling.

If you have not previously stored a voicemail number, then you will see No Number Available. See “Store Your Voicemail Number” on page 144 for instructions on how to enter a voicemail number.

Note: This feature is network and subscription dependent in cellular mode. Contact your service provider for additional information.
Managing Your Received Messages

How Your Phone Notifies You of Messages

If your phone is powered on, it notifies you of received messages in the following ways:

- **An alert sounds and/or the phone vibrates.**
  
  Your phone beeps and/or vibrates three times to inform you of an incoming message. (See page 153 for instructions on how to set your phone’s alert.)

- **The (message) indicator is displayed.**

- **The message is displayed immediately**
  
  and remains on the display for several seconds.

  or

  **Message Read Now? is displayed** if the message is an alphanumeric text message of up to 160 characters. For more information see “Read a New Message” on page 132.

How Messages Are Stored

Your phone stores all messages on your SIM card. The total number of messages that you can store depends on your service provider.

If the message indicator is flashing, your SIM card is full. See “Delete a Message” on page 134 to make room for the new message.
What Messages Contain

You can receive short text or numeric messages in your Personal Mailbox. Text messages may contain up to 160 characters. Numeric messages—typically phone numbers—may contain up to 20 digits.

Your personal mailbox works along with call forwarding. For more information see “Personal Mailbox” on page 53, and the call forwarding feature descriptions on pages 108-115.

Messages contain multiple screens with the following information:

• the message
• the date and time the message was sent
• the phone number (if available) from which the message was sent
Accessing Received Messages

Read a New Message

Notification Messages
An incoming voicemail notification message automatically scrolls across your screen. You can:

- Press OK to store it on your SIM card.
- Press C to delete it.

Text Messages
When you receive a new alphanumeric message, you will see Message Read Now? To read it:

1. Press OK and continue with step 2.
   or
   Press C to read the message later. See “Read a Stored Message” on page 133.

2. Press <page down> to move forward through a message one screen at a time.

3. Press OK to access menu options for the message. These options are described on pages 134-135.

Notes:

- If you are in cellular mode and you remove your GSM Cellular Cassette you will not be able to access your messages. Switch to satellite mode or reinsert your GSM cellular cassette.

- If the message storage space on your SIM card is full, you will not be able to store a message for later retrieval. Use the delete message feature (page 134) to make room for new messages on your SIM card.

This feature is not available in TDMA or CDMA cellular mode.
Read a Stored Message

To read a stored message that you have received:

1. **Follow the steps in** “Getting to Received Messages...” to enter the message center. You will see the number of messages stored, followed by the first message. If you do not have any messages, you will see No Messages.

2. **Press** \( \text{MENU} \) to scroll through the message one screen at a time.

3. **Press** \( \text{OK} \) to access menu options for the message.

   or

   **Press and hold** \( \text{C} \) to exit the menu.

This feature is not available in TDMA or CDMA cellular mode.
**Go to the Next Message**

To go to the next message:

1. **Follow the steps** in “Read a Stored Message” on page 133.

2. **Press**  until you see Go To Next Message and then **press OK**. You will see the next message. If you are at the end of your message list you will see the first message again.

3. **Press**  to scroll through the message one screen at a time.

4. **Repeat steps 2 to 3** to read all of your messages.

5. **Press and hold**  to exit the menu.

This feature is not available in TDMA or CDMA cellular mode.

**Delete a Message**

Use this feature to make room for new messages on your SIM card.

1. **Follow the steps** in “Go to the Next Message” (above) until you see the message you want to delete, and then **press OK**.

2. **Press**  until you see Delete Message, and then **press OK**. You will see Message Deleted.

3. **Press and hold**  to exit the menu.

This feature is not available in TDMA or CDMA cellular mode.
**Return a Call**

A callback number appears in quotes within the received message. If one is enclosed, you can instantly place a call to that number. If a callback number is not included, your phone selects the first number in the message.

**Note:** You must subscribe to this network feature through your service provider. Contact your service provider for additional information.

1. **Follow the steps** in “Go to the Next Message” on page 134 to display the desired message, and then press OK.
2. Press Menu until you see Return Call.
3. Press OK to place a call to that number. You will see the number followed by Calling.

This feature is not available in cellular mode.

**Edit a Stored Message**

You can edit a message that you have received, then send the modified message and/or store it in the outgoing messages list.

1. **Follow the steps** in “Go to the Next Message” on page 134 until you see the message you want to edit, and then press OK.
2. Press Menu until you see Edit Message and then press OK.

The message is copied to the message editor. You will see the final portion of the message displayed in the editing area. The cursor is placed at the end of the message.

For instructions on how to edit a message, see “Message Editor” on page 136.

This feature is not available in cellular mode.
Managing Outgoing Messages

You can create a new message and send it immediately, or store it in an outgoing messages list for later use. You can also edit a message that you have received, then send and/or save the modified message. Messages are created and edited in the message editor.

Message Editor

The message editor lets you create a new message or modify a stored message (received or outgoing).

You use the keypad to create or edit a message. You can produce any letter in the alphabet by pressing the appropriate key. For example, press 2 to enter the letters A, B, or C, as shown:

- press 1 time to insert an A
- press 2 times to insert a B
- press 3 times to insert a C
- press 4 times to insert a 2

For a complete list of the characters you can enter from the keypad, see page 83.

Note: This feature must be activated by your service provider. Contact your service provider for additional information.
Create a New Message

To create a new message in the message editor:

1. **Follow the steps in** “Getting to Message Features...” to get to **Message Editor**, and then **press** (OK) to select.

   The message editor displays the contents of the last message entered. If there are no previous messages, the cursor is placed in the upper left corner of the editing area.

2. **Press and hold** (C) to clear the entire message editor contents, if necessary.

3. Begin composing your message. **Enter a letter** by pressing a key as many times as necessary.

4. **Press** (A) to advance the cursor.

5. **Repeat steps 3 and 4** as many times as necessary to complete your message.

   Lines of text are automatically formatted in the display. When you reach the bottom of the editing area, the top lines of text scroll up and off the display in order to keep the cursor and the last few lines of text in view.

When you have finished composing your message:

6. **Press** (OK) to access options for that entry.

   Message editor menu options let you send the message immediately or store it for later use. These options are described on pages 138-139.

**Tip:** **Press and hold any numeric key** to toggle between uppercase and lowercase characters.
**Edit a Message**

You can edit a new message at any time while you are creating it.

You can also edit received messages or messages stored in the outgoing messages list. See “Edit a Stored Message” on page 135 for instructions on how to copy a received message into the message editor. See “Edit a Stored Message” on page 142 for instructions on how to copy an outgoing message into the message editor.

To delete text in a message:

1. Press \( \text{ } \) to scroll the cursor to the right of the text you want to delete.

2. Press \( \text{ } \) to delete one character at a time.
   
or
   
   Press and hold \( \text{ } \) to clear the display.

To add text to a message:

1. Press \( \text{ } \) to scroll the cursor to the location where you want to add new text.

2. Enter a letter by pressing a key as many times as necessary.

**Send a Message**

To send a message from the message editor:

1. Press \( \text{ } \) to access message editor menu options.

2. Press \( \text{ } \) until you see Send Message and then press \( \text{ } \). You will be prompted to enter the destination address (phone number) for the message.

3. Enter the destination address and then press \( \text{ } \) to send the message.
The message is sent to your message service center, which forwards the message to its final destination. You will see Message Sent when the message arrives at the service center.

If the message cannot be delivered to the service center, you will see Message Failed, followed by Resend? on the next line. You can:

- Press OK to resend the message.
- or
- Press C to abandon the attempt to send the message at this time. See “Store a Message” on page 139 for instructions on how to store the message for later mailing.

If you have not previously stored a service center number, then you will see No Service Center. See “Enter Service Center Number” on page 145 for instructions on how to enter a service center number.

**Store a Message**

To store the contents of the message editor to the outgoing messages list:

1. Press OK to access message editor menu options.
2. Press until you see Store Message and then press OK. You will see Stored to Outgoing.

Outgoing messages are stored on your SIM card. When the SIM card is full (indicated by a flashing message indicator), you will not be able to store a message for later retrieval. Use the delete message feature (page 143) to make room for new messages on your SIM card.

The message editor is not available in cellular mode.

**Cellular Mode**
**Getting to Outgoing Messages...**

1. Press 📬 to go directly to the Messages menu.
   
   or
   
   Press Menu until you see Messages, and then press OK.
2. Press Menu to scroll to Outgoing Messages, and then press OK.
3. Press Menu to scroll to one of the features described below.

---

**Read a Stored Message**

This feature displays the first message stored in the outgoing messages list.

**Note:** This feature must be activated by your service provider. Contact your service provider for additional information.

**Satellite Mode**

To read a stored message in satellite mode:

1. **Follow the steps in** “Getting to Outgoing Messages...” to enter the message center. You will see the number of messages stored, followed by the first message. If you do not have any messages, you will see No Messages.
2. **Press Menu** to scroll through the message one screen at a time.
3. **Press OK** to access menu options for the message.
   
   or
   
   Press and hold ‌‌ to exit the menu.

**Cellular Mode**

This feature is not available in cellular mode.
Go to the Next Message

This feature takes you to the next message in the outgoing messages list.

Note: This feature must be activated by your service provider. Contact your service provider for additional information.

To go to the next message in satellite mode:

1. Follow the steps in “Read a Stored Message” on page 140.

2. Press \( \text{Menu} \) until you see Go To Next Message and then press \( \text{OK} \). You will see the next message.

3. Press \( \text{Menu} \) to scroll through the message one screen at a time.

4. Repeat steps 2 to 3 to read all of your messages.

5. Press and hold \( \text{Exit} \) to exit the menu.

This feature is not available in cellular mode.

Send a Stored Message

This feature sends a message stored in the outgoing messages list.

Note: This feature must be activated by your service provider. Contact your service provider for additional information.

To send a stored message in satellite mode:

1. Follow the steps in “Read a Stored Message” on page 140.

2. Press \( \text{Menu} \) until you see Send Message and then press \( \text{OK} \). You will be prompted to enter the destination address (phone number) for the message.
3. **Enter the destination address** and then press **OK** to send the message.

The message is sent to your message service center, which forwards the message to its final destination. You will see Message Sent when the message arrives at the service center.

If the message cannot be delivered to the service center, you will see Message Failed, followed by Resend? on the next line. You can:

- Press **OK** to resend the message.
- or
- Press **C** to abandon the attempt to send the message at this time.

If you have not previously stored a service center number, then you will see No Service Center. See “Enter Service Center Number” on page 145 for instructions on how to enter a service center number.

**Cellular Mode**

This feature is not available in cellular mode.

**Edit a Stored Message**

You can edit a message that you have stored in the outgoing messages list.

**Note:** This feature must be activated by your service provider. Contact your service provider for additional information.

**Satellite Mode**

To edit a stored message in satellite mode:

1. **Follow the steps** in “Go to the Next Message” on page 141 until you see the message you want to edit, and then press **OK**.
2. Press **MIN** until you see Edit Message and then press **OK**.
The message is copied to the message editor. You will see the final portion of the message displayed in the editing area. The cursor is placed at the end of the message.

For instructions on how to edit a message, see “Message Editor” on page 136.

This feature is not available in cellular mode.

**Delete a Stored Message**

Use this feature to make room for new messages on your SIM card.

**Note:** This feature must be activated by your service provider. Contact your service provider for additional information.

To delete a stored message in satellite mode:

1. **Follow the steps** in “Go to the Next Message” on page 141 until you see the message you want to delete, and then press **OK**.
2. **Press** **MENU** until you see Delete Message, and then **press** **OK**. You will see Message Deleted.
3. **Press and hold** **C** to exit the menu.

This feature is not available in cellular mode.
Managing Other Message Settings

Store Your Voicemail Number

To store a voicemail number:

1. **Follow the steps** in “Getting to Message Settings...” to get to Voicemail Number, and then press OK to select. You will see Enter Voicemail Number followed by your current voicemail number. If this is the first time you have stored a number, continue with step 3.

2. Press OK to select Voicemail Number. Press C to clear one digit at a time, or press and hold C to erase the entire number.

3. Enter the new number, and then press OK. You will see Completed.

4. Press and hold C to exit the menu.

**Note:** This feature is network and subscription dependent in cellular mode. Contact your service provider for additional information.

**Tip:** Use pause dialing to store your voicemail access and PIN numbers together. See “Using Pauses in Numbers” on page 84.
Enter Service Center Number

Use this feature to enter the number for the service center that forwards your outgoing messages. You must specify a service number before you can send any messages.

Note: This feature must be activated by your service provider. Contact your service provider for additional information.

To enter the service center number in satellite mode:

1. Follow the steps in “Getting to Message Settings...” to get to Service Centre, and then press OK to select. You will see Enter Service Number followed by your current service center number. If this is the first time you have stored a number, continue with step 3.

2. Press C to clear one digit at a time, or press and hold C to erase the entire number.

3. Enter the new number, and then press OK. You will see Completed.

4. Press and hold C to exit the menu.

This feature is not available in cellular mode.

Satellite Mode

Tip: The service center number is normally provided by your service provider.

Cellular Mode
Getting to Message Settings...

1. Press \( \text{to go directly to the Messages menu.} \)
   or
   Press \( \text{ until you see Messages, and then press } \text{.} \)
2. Press \( \text{ to scroll to Message Settings, and then press } \text{.} \)
3. Press \( \text{ to scroll to one of the features described below.} \)

**Satellite Mode**

**Set Expiry period**

This feature specifies the maximum amount of time, in hours, that an unforwarded outgoing message will remain at the service center before it is deleted.

**Note:** This feature must be activated by your service provider. Contact your service provider for additional information.

To set the message expiration period in satellite mode:

1. **Follow the steps in “Getting to Message Settings...”** to get to Expiry Period, and then press \( \text{ to select. You will see Enter Hours followed by the current setting.} \)

2. Press \( \text{ to clear one digit at a time, or press and hold } \text{ to erase the entire number.} \)

3. **Enter the new number, and then press } \text{. You will see Hours followed by the number you entered.} \)

4. **Press and hold \( \text{ to exit the menu.} \)

**Cellular Mode**

This feature is not available in cellular mode.
Specify Outgoing Message Type

You can send messages to a device which interprets them in a format other than text. Your service center converts the messages before forwarding them to the destination address.

Note: This feature must be activated by your service provider. Contact your service provider for additional information.

To specify the outgoing message type in satellite mode:

1. Follow the steps in “Getting to Message Settings...” to get to Outgoing Message Type, and then press OK to select.
2. Press MENU to scroll to the desired type, and then press OK to select it.
3. Press and hold C to exit the menu.

This feature is not available in cellular mode.
## Customizing Phone Features

Once you are comfortable with the basic features of your new phone, use the Phone Setup menu to configure your phone the way you like it.

The feature selection on the Phone Setup menu varies depending on your mode setting. The table below shows the features available in each mode. See “Selecting a Mode” on page 185 for more information on changing modes.

Customizing Phone Features

Managing Phone Ringer Settings

You can adjust your phone’s ringer volume and tone, and set the phone to ring or vibrate to notify you of incoming calls.

Adjust the Ringer Volume

Use this feature to adjust the volume of the ringer. The phone sounds the new volume level as you adjust it.

1. Follow the steps in “Getting to Phone Setup...” to get to Adjust Ring Volume, and then press to select.

2. Increase the volume by pressing the upper volume control key.
   or
   Decrease the volume by pressing the lower volume control key.

3. Press and hold to exit the menu.

Tip: You can also press , and then the up or down volume control key.
Set the Phone to Ring or Vibrate

This feature is ideal for situations where a ringing phone is inappropriate or in noisy places where you might not hear the ringer. The VibraCall® alert function notifies you of incoming calls by discreet vibrations.

1. **Follow the steps in** “Getting to Phone Setup...” to get to Ring or Vibrate, and then press \( \text{OK} \) to select.

2. **Press** \( \text{Menu} \) to scroll to Ring Only, Vibrate Only, Vibrate then Ring, or No Ring or Vibrate, and then press \( \text{OK} \) to select the displayed option. You will see Completed.

3. **Press and hold** \( \text{End} \) to exit the menu.

Tip: If you select Vibrate then Ring, your phone vibrates for two cycles, and then rings.

Set the Ringer Tone

Select your favorite tone from 10 different options.

1. **Follow the steps in** “Getting to Phone Setup...” to get to Set Ringer Tone, and then press \( \text{OK} \) to select.

2. **Press** \( \text{Menu} \) to scroll through the ringer tone options. You will hear a one-ring-cycle demonstration of each tone as its name is displayed.

3. **Press** \( \text{OK} \) to select the desired ringer tone.

4. **Press and hold** \( \text{End} \) to exit the menu.
Locking and Unlocking Your Phone

These features can help you prevent unwanted use of your phone.

**Lock the Phone Automatically**

Use this feature to set your phone to lock itself every time it is powered on.

1. **Follow the steps in** “Getting to Phone Lock...” to get to Automatic Lock, and then press \( \text{OK} \) to select.
2. Press \( \text{M} \) to choose On or Off, and then press \( \text{OK} \) to select. You will see Completed.
3. Press and hold \( \text{C} \) to exit the menu.

**Lock the Phone Instantly**

Use this feature to lock your phone immediately.

1. **Follow the steps in** “Getting to Phone Lock...” to get to Lock Now.
2. Press \( \text{OK} \) to select. You will see: Locked.

**Note:** Once you unlock your phone, it remains unlocked until you lock it again.

**Unlock the Phone**

**Tip:** The factory default unlock code is 1234.

1. **Enter unlock code.** Enter your four-digit phone unlock code.
2. Press \( \text{OK} \).
**Change the Unlock Code**

The unlock code is originally set to 1234. You should change it as soon as possible.

1. **Follow the steps in “Getting to Phone Lock...”** to get to Change Unlock Code, and then press OK to select. You will see Enter Security Code.

2. **Enter security code.** Enter your six-digit security code. You will see your current lock code and Enter Phone Unlock Code.

3. **Press C to clear one digit at a time, or press and hold C to clear all the digits.**

4. **Enter new code.** Enter a new four-digit unlock code, and then press OK. You will see Phone Lock and the new lock code.

5. **Press and hold C to exit the menu.**

**Tip:** The factory default security code is 000000.
activating the infrared data port

Use this feature to activate the infrared data port on your phone when you want to establish a wireless infrared connection with an external device.

1. Follow the steps in “Getting to Phone Setup...” to get to Activate IR Port, and then press OK to select. You will see Activating Cancel?

2. Align your phone so that the infrared data port on the phone is in direct line of sight with the infrared data port on the external device. Make sure that both infrared data ports are within their effective range. You will see Activated when the connection is established.

3. Press and hold to exit the menu.

Your phone waits for an infrared connection for up to five minutes. If an infrared connection cannot be established, and your phone is running on battery power, the phone then deactivates the infrared data port. Before deactivating, your phone emits an alert tone and displays Reactivate IR Port for ten seconds. Press OK when you see this message to reactivate the infrared data port.

If you move your phone out of effective range for more than one minute when an infrared connection has been established, you will see Connection Lost.

For instructions on using TrueSync to exchange contact information with your computer, please refer to the TrueSync User’s Guide.

Note: This feature will be available in the first quarter of 2000.
Protecting the SIM Card

You can use a Personal Identification Number (PIN) code to protect the information stored on your SIM card even when it is inserted into someone else’s phone.

Activate and Deactivate the SIM Card PIN Code

When you activate the SIM card PIN code, your phone requests the code whenever the phone is powered on. To change this setting, you need to enter the PIN code that your service provider gave you.

1. Follow the steps in “Getting to Require SIM Card PIN...” to scroll to On or Off, and then press OK to select. You will see Enter PIN.
2. Enter code. Enter your four- to eight-digit SIM card PIN code, and then press OK. You will see Completed.
3. Press and hold ◼ to exit the menu.

Tip: You should have received your SIM card PIN code from your service provider.
Change the SIM Card PIN Code

To choose your own PIN code:

1. Follow the steps in “Getting to Require SIM Card PIN...” to get to Change SIM Card PIN, and then press OK to select. You will see Enter Old PIN.

2. Enter the current PIN code, and then press OK. You will see Enter New PIN.

3. Enter a new PIN code, and then press OK. You will see Repeat New PIN.

4. Re-enter the new PIN code, and then press OK again. You will see Completed.

5. Press and hold C to exit the menu.

Unblock the PIN Code

If your PIN code is entered incorrectly three times in a row, Blocked appears in the display. You need to enter a PIN unblocking key (PUK1), which you can obtain from your service provider.

1. Press * * 0+ 5 * *.

2. Enter unblocking key. Enter the eight-digit PUK1 unblocking key, and then press OK. Your service provider supplies this code.

3. Enter a new PIN code, and then press OK.

4. Re-enter the new PIN code, and then press OK.
Managing Other Security Settings

Your phone includes other security features:

- a SIM card PIN2 code for accessing fixed dialing settings and other subscription-dependent features
- a security code controls access to security and other menu options

Change the SIM Card PIN2 Code

Your SIM card PIN2 code is used to access fixed dialing settings. This four- to eight-digit code is issued to you when you subscribe to the feature. Use this feature to choose a new code.

1. Follow the steps in “Getting to Phone Setup...” to get to Change SIM PIN2 Code, and then press OK to select. You will see Enter Old PIN2.

2. Enter the current PIN2 code, and then press OK. You will see Enter New PIN2.

3. Enter new PIN2 code, and then press OK. You will see Repeat New PIN.

4. Re-enter the new PIN2 code, and then press OK again. You will see Completed.

5. Press and hold C to exit the menu.

Tip: You should have received your SIM card PIN2 code from your service provider.
Unblock the PIN2 Code

If your PIN2 code is entered incorrectly three times in a row, Blocked appears in the display. You need to enter a PIN2 unblocking key (PUK2), which you can obtain from your service provider.

1. Press * * 0 5 2 *.
2. Enter unblocking key. Enter the eight-digit PUK2 unblocking key, and then press OK. Your service provider supplies this code.
3. Enter a new PIN2 code, and then press OK.
4. Re-enter the new PIN2 code, and then press OK.

Change the Security Code

The security code is your phone’s primary security number. You use it to reset your phone to its default settings and prevent access to your phone book. It is originally set to 000000.

1. Follow the steps in “Getting to Phone Setup...” to get to New Security Code, and then press OK to select. You will see Enter Security Code.
2. Enter the current security code, and then press OK. You will see Enter New Security Code.
3. Enter a new security code, and then press OK. You will see Secur. Code and the six-digit number selected.
4. Press and hold C to exit the menu.
Activating Extended Menus

This feature activates and deactivates the extended menus. See “Personalizing the Options Menu” on page 200 to learn how extended menus can make your phone even simpler to use.

1. **Follow the steps in** “Getting to Phone Setup...” to get to Extended Menus, and then press **OK** to select.

2. Press **MENU** to choose On or Off, and then press **OK**.

3. **Press and hold** ✈️ to exit the menu.

When extended menus are deactivated, you can activate them temporarily to access hidden features. Press and hold **MENU** to activate the extended menus temporarily. This shortcut displays all extended menus features until you exit the Options menu.
Managing Time and Date Settings

**View the Time and Date**

Use this feature to view the current time and date in one of two time zones.

**Note:** This feature is available only when the extended menus are activated. See “Activating Extended Menus” on page 161.

1. **Follow the steps in “Getting to Phone Setup...”** to get to Show Time and Date, and then press OK to select.

2. Press menu to choose Show Home Time + Date or Show Away Time + Date, and then press OK. The selected time and date are displayed.

3. Press any key to clear the time and date from the display and return to the menu.

4. Press and hold  to exit the menu.
Change the Time Displayed

Use this feature to determine which time is displayed on your real time clock indicator.

Note: This feature is available only when the extended menus are activated. See “Activating Extended Menus” on page 161.

1. Follow the steps in “Getting to Phone Setup...” to get to Show Time and Date, and then press OK to select.
2. Press MENU to scroll to Change Clock, and then press OK.
3. Press MENU to scroll to either Home Time or Away Time, and then press OK to select.
4. Press and hold to exit the menu.

Set the Time Format

You can choose a 12-hour or 24-hour time format.

Note: This feature is available only when the extended menus are activated. See “Activating Extended Menus” on page 161.

1. Follow the steps in “Getting to Phone Setup...” to get to Set Time Format, and then press OK.
2. Press MENU to choose either 12-hour or 24-hour, and then press OK to select.
3. Press and hold to exit the menu.
**Set the Time and Date**

To make it easy to check the local time when you travel, your phone can save the current time and date for two different time zones.

**Note:** This feature is available only when the extended menus are activated. See “Activating Extended Menus” on page 161.

**Tip:** The time displayed (home or away) on the real time clock indicator is the one you selected on page 163.

1. **Follow the steps in “Getting to Phone Setup...”** to get to Set Time and Date, and then press \( \text{OK} \) to select.
2. **Press \( \text{MENU} \) to choose Set Home Time + Date or Set Away Time + Date, and then press \( \text{OK} \).** You will see Enter Time and the time currently set.
3. **Press \( \text{OK} \) to accept the displayed time.**
   or
   **Enter the time** in 24-hour format, and then press \( \text{OK} \). You will see Enter Date and the date currently set.
4. **Press \( \text{OK} \) to accept the displayed date.** You will see Completed.
   or
   **Enter the date** in day(dd)-month(mm)-year(yy) form and then press \( \text{OK} \). You will see Completed.
5. **Press and hold \( \text{C} \) to exit the menu.**
Selecting the Display Language

Your phone contains 21 languages. Use this feature to select the language in which your phone displays menus and messages.

Note: This feature is available only when the extended menus are activated. See “Activating Extended Menus” on page 161.

1. Follow the steps in “Getting to Phone Setup...” to get to Language Selection, and then press OK to select.

2. Press MENU to scroll through the choices, and then press OK to select the displayed option.

3. Press and hold EXIT to exit the menu.

If you accidentally change the language of your phone’s display, press and hold the EXIT key to return to the idle display, then press MINI 26 OK to return directly to the language selection submenu.
Turning Lights On and Off

You can activate or deactivate all phone lighting, including the phone status indicator, display backlighting, and keypad backlighting.

Note: This feature is available only when the extended menus are activated. See “Activating Extended Menus” on page 161.

1. **Follow the steps in “Getting to Phone Setup...”** to get to Lights, and then press OK to select.
2. Press menu to choose On or Off, and then press OK to select the displayed option.
3. Press and hold ⚡ to exit the menu.
Setting Keypad Tones

Choose the sounds your phone makes when its keys are pressed.

**Note:** This feature is available only when the extended menus are activated. See “Activating Extended Menus” on page 161.

1. **Follow the steps in** “Getting to Phone Setup...” to get to Select Keypad Tones, and then press `[OK]` to select.

2. **Press** `[M]` to choose Normal Tones, Single Tone, or No Tones, and then press `[OK]`.

3. **Press and hold** `[C]` to exit the menu.
Managing Phone Settings

Review Your Phone’s Settings

Use this feature to review all of your phone’s settings that have changed from their original default settings.

Satellite Mode

To review all settings:

1. **Follow the steps in** “Getting to Phone Status...” to get to Status Review, and then press OK.
2. Press to scroll through the list of all the menu items you have changed.
3. Press and hold to exit the menu.

**Note:** You can reset your phone’s original settings if desired. See “Reset Phone Options to Factory Defaults” on page 169.

Cellular Mode

This feature is not available in cellular mode.

Getting to Phone Status...

1. Press until you see Phone Setup, and then press OK.
2. Press to scroll to Phone Status, and then press OK.
3. Press to scroll to one of the features described below.
Reset Phone Options to Factory Defaults

Use the master reset feature to reset all settings to their original default settings. This feature:

- resets audible call timers, the in-call timer, and the automatic lock
- resets extended menus to default setting
- restores keypad tones to normal, ringer tone to standard, and the volume level to the middle (fourth bar) of its range
- resets cellular mode (TDMA and CDMA) emergency number and international dialing prefix
- resets the mode selection (this may cause your phone to switch modes)

To reset all settings:

1. **Follow the steps in** “Getting to Phone Status...” to get to Master Reset, and then press \( \text{OK} \) to select. You will see Enter Security Code.

2. **Enter your six-digit security code.** You will see Reset Complete.

3. **Press and hold \( \text{C} \) to exit the menu.**

This feature is not available in cellular mode. However, when you reset your settings from satellite mode, your cellular settings are reset as well.

Satellite Mode

**Tip:** The factory default security code is 000000.

Cellular Mode
Clear All Stored Information

The master clear feature resets the same items as master reset, plus the following:

- clear phone book entries from phone memory (not from SIM memory)
- clear last ten calls made and received lists
- reset resettable call timers

Master clear does not clear the:

- fixed dial list
- my number(s) list
- received messages list

Satellite Mode

To clear all settings:

1. Follow the steps in “Getting to Phone Status...” to get to Master Clear, and then press to select. You will see Enter Security Code.
2. Enter your six-digit security code. You will see Reset Complete.
3. Press and hold to exit the menu.

Cellular Mode

This feature is not available in cellular mode. However, when you clear your settings from satellite mode, your cellular settings are cleared as well.
Cellular Mode Settings

These phone setup features are available in TDMA and CDMA cellular modes only. For information on switching to cellular mode, see “Selecting a Mode” on page 185.

Set Up the Emergency Number

This feature is not available in satellite mode or GSM cellular mode.

This feature allows you to dial 112 to make an emergency call even if your local emergency number is not 112. The default number is 911.

1. Follow the steps in “Getting to Phone Setup...” to get to Emergency Mapping, and then press OK to select. You will see Enter Number?
2. Enter number. Enter your local emergency number and then press OK.
3. Press and hold \( \text{OK} \) to exit the menu.

Satellite Mode

- Cellular Mode (GSM 900/1800)
- (GSM 900)

Cellular Mode

- (TDMA 800/1900)
- (CDMA 1900)
- (CDMA/AMPS)
Set Up an International Prefix

This feature is not available in satellite mode or GSM cellular mode.

This feature allows you to use the \textbf{0+} key (international dialing prefix \textdagger) to make an international call without entering the access code for the country, no matter what mode you are in. The default prefix is 001.

1. \textbf{Follow the steps in} “Getting to Phone Setup...” to get to Intl Dialing Prefix, and then press \textbf{OK} to select. You will see Enter Number?.

2. \textbf{Enter number.} Enter the international access code for the country you are in, and then press \textbf{OK}.

3. \textbf{Press and hold} \textbf{C} to exit the menu.
Set System Scan Preference

This feature is not available in satellite mode, GSM cellular mode, TDMA cellular mode, or CDMA 1900 cellular mode.

The system scan feature lets you select the type of cellular system your phone accesses. This feature typically is configured by your cellular service provider.

Select a System Scan Method

The display shows Analog when you are registered with an analog system, or Digital when you are registered with a digital system.

1. Follow the steps in “Getting to Phone Setup...” to get to System Scan, and then press OK to select.

2. Press more to scroll to Std A/B, Scan A/B, Std B/A, Scan B/A, Scan A, Scan B, Home Only, or Preferred SIDs, and then press OK to select.

   See the table on page 174 for a description of these system scan settings.

3. Press and hold on to exit the menu.
### System Scan Settings

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
</table>
| Standard Mode            | Your phone first seeks a home type system, then a non-home type system.  
- If home system is non-wireline (type A), you will see Std A/B.  
- If home system is wireline (type B), you will see Std B/A. |
| Reversed Preference Mode | Your phone first seeks a non-home type system, then a home type system. (This mode may be useful in fringe areas or certain roaming situations.)  
- If home system is non-wireline (type A), you will see Scan B/A.  
- If home system is wireline (type B), you will see Scan A/B. |
| Home Only Mode           | Your phone does not operate outside its home system. You will see Home Only.                                                                |
| Scan A Mode              | You phone operates only within non-wireline (A) systems. You will see Scan A.                                                              |
| Scan B Mode              | Your phone operates only within wireline (B) systems. You will see Scan B.                                                                 |
| Enhanced Preferred Scanning Mode | Your phone scans for home or programmed preferred System ID numbers (SIDs) first. This mode requires entry of the SIDs for the systems in which you wish to operate. Contact your cellular service provider for SID information.  
If you have selected two system operation, the phone seeks cellular service according to the system type mode selected for each phone number.  
You will see Preferred SIDs. |
Switch Phone Numbers

This feature is not available in satellite mode or GSM cellular mode.

Your phone can operate on two to four different home systems depending on your Cellular Cassette. This feature lets you change your active number to the one appropriate for your current area. All the phone numbers are designated as your home system, but only one number can be active at any given time. Calls are placed and received by the currently active number only.

To change the active phone number:

1. Follow the steps in “Getting to Phone Setup...” to get to Change Number, and then press OK to select. You will see your active number with a ✓ next to it.

2. Press ▼ to scroll through your phone numbers and press OK to switch to that phone number.

   Note: Contact your service provider to add additional numbers to this list.

3. Press OK to confirm the new setting. You will see Set.

4. Press and hold to exit the menu.
Accessing the Network

This chapter shows you how to register with the Iridium® satellite network in satellite mode, or how to locate and register with an available local network in GSM cellular mode.

The feature selection on the Network Selection menu varies depending on your mode setting. The table below shows the features available in each mode. See “Selecting a Mode” on page 185 for more information on changing modes.

<table>

Registering With the Satellite Network

Use this feature to access Iridium satellite service. Your phone searches for the Iridium satellite network.

1. **Rotate and extend the antenna** upward. See “Holding the Phone” on page 44.

2. **Follow the steps in** “Getting to Network Selection...” to get to **Register Now**.

3. **Press** to select. You will see **Registering...**. This may take a few seconds.

   - If the phone finds the signal, you will see **Registered** and the signal strength indicator:

     ![Signal Strength Indicator]

     The **(home system)** indicator also appears.

   - If the phone is unsuccessful you may see one of these messages: **Rotate and Extend Antenna, Check Signal, Busy Try Later, Please Try Later**, or **Restricted Area**.

**Note:** You must wait three minutes between registration attempts.

This feature is not available in cellular mode.

---

**Getting to Network Selection...**

1. **Press** until you see **Network Selection**, and then **press**.

2. **Press** to scroll to one of the features described below.
**Getting to Network Selection...**

1. Press \[\text{Menu}\] until you see \text{Network Selection}, and then press \[\text{Ok}\].
2. Press \[\text{Menu}\] to scroll to one of the features described below. You will see the feature name, followed by \text{Select}?.

---

**Cellular Mode Settings**

These network selection features are available in GSM cellular mode only. For information on switching to cellular mode, see “Selecting a Mode” on page 185.

**Scanning for Available Networks**

This feature is not available in satellite mode.

This option scans to see which networks are operating in your current location.

1. **Follow the steps** in “Getting to Network Selection...” to get to \text{Available Networks}, and then press \[\text{Ok}\]. You will see \text{Scanning} and then a list of the available networks.

2. Press \[\text{Menu}\] to scroll to the network you want to register with, and then press \[\text{Ok}\]. You will see \text{Register Now}?.

3. Press \[\text{Ok}\] to register with the network. You will see \text{Searching}.

When your phone has completed registering with the network, you will see the name of the network and either the \[\text{Home}\] (home system) or \[\text{Roam}\] (roam) indicator.

This feature is not available in TDMA or CDMA cellular mode.
Setting Network Search Method

This feature is not available in satellite mode.

When your phone needs to register with a network, it generates a sorted list of networks. The network list is sorted in the following order:

- the home network
- networks from a preferred list
- random list of other networks found above a certain signal strength
- remaining networks in descending order of signal strength

Any forbidden networks stored in the SIM card are not included in the sorted list. This feature allows you to determine how the phone tries to register with a system. See the table on page 182 for a description of the available search methods.

To set your network search method:

1. **Follow the steps in “Getting to Network Selection...”** to get to Network Search, and then press OK. You will see Registration Preferences.

2. Press OK.

3. Press menu to scroll to Automatic Search or Manual Search, and then press OK. You will see Completed.
You can select one of the following search methods:

<table>
<thead>
<tr>
<th>Method</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Automatic Search</td>
<td>The phone tries to register with the first network in the sorted list that satisfies the GSM network search rules described on page 181. If this is successful your phone displays the network name.</td>
</tr>
</tbody>
</table>
| Manual Search     | The phone shows a sorted list of networks within range. You select the network with which you want to register. You will see Search Network followed by Search?  
1. **Press** OK to generate the sorted list.  
2. **Press** menu to select the network you want to register with, and then press **OK**. You will see Register Now?.  
3. **Press** OK to register with that network.  
When your phone has completed registering with the network, you will see the name of the network and the 🏛 or ▲ indicator. |

**Cellular Mode**  
(TDMA 800/1900)  
(CDMA 1900)  
(CDMA/AMPS)

This feature is not available in TDMA or CDMA cellular mode.
Finding a New Network

This feature is not available in satellite mode.

When your phone tries to register with a network, it excludes your current network from the search. If the attempt fails, your phone then attempts to re-register with the previous network.

1. **Follow the steps in** “Getting to Network Selection...” **to get to** Find New Network, and then **press OK**.

   If you are using the automatic search method (described on page 182), you will see Searching and then the name of the network.

   If you are using the manual search method (described on page 182), continue with step 2.

2. **Press ** to scroll to the network you want to register with, and then **press OK**. You will see Searching and then the name of the network.

This feature is not available in TDMA or CDMA cellular mode.
Selecting a Mode

If you have an optional Cellular Cassette installed in your satellite phone, you can access the cellular network as well as the satellite network. This chapter shows you how to select the type of service you want to use, and how to set your mode selection preferences on the Mode Selection menu.

The table below shows the features available on the Mode Selection menu.

<table>
<thead>
<tr>

1 This feature may not be available for some GSM Cellular Cassette users. Check with your service provider.
Mode Selection Menu

All Modes

Mode Selection
- Cellular Preferred
- Cellular Always
- Satellite Preferred
- Satellite Always
**Phone Behavior by Mode**

**Preferred (Automatic) Modes**

When you select a preferred mode, your phone looks for that type of service first. If it cannot find your preferred service, after about five minutes, it switches automatically to your non-preferred service. If the phone switches to a non-preferred service, it checks at regular intervals (every 30 minutes) to see if your preferred service has become available. The exact intervals that your phone switches modes and checks for preferred service varies depending on your SIM card. Check with your service provider.

**Note:** The phone postpones a switch between modes while you are in a call or are actively using one of the phone’s features.

**Always (Manual) Modes**

If you select an always mode, your phone always accesses that type of service. If you become out-of-range in that mode, the phone does not switch to the other type of service. You have to manually switch it to the other mode by changing the settings in this menu.
Selecting Satellite Mode

Select Satellite Preferred Mode

When you select this feature, your phone uses your Iridium satellite service if possible. When you are in satellite mode, you will see the ✽ (satellite mode) indicator in the lower left corner of your display.

If you are out of range and are unable to access a satellite, your phone switches automatically to cellular mode. If this happens, you no longer will see the ✽ indicator in the lower left corner of your display.

1. Follow the steps in “Getting to Mode Selection...” to get to Satellite Preferred.

2. Press OK to select.

   If you see the message Check Cassette or Insert Cassette, make sure your cassette is installed and is installed properly.

3. Press and hold ✈ to exit the menu.

Note: This feature may not be available for some GSM Cellular Cassette users. If you power up your phone with a GSM Cellular Cassette inserted, your phone may switch to Cellular Preferred mode.

Tip: You must have a Cellular Cassette installed in your phone for this selection to work properly.
Select Satellite Always Mode

When you select this feature, your system always accesses the Iridium satellite network. When you are in satellite mode, you will see the 🌍 (satellite mode) indicator in the lower left corner of your display.

1. **Follow the steps in** “Getting to Mode Selection...” **to get to Satellite Always.**

2. **Press** 🔄 **to select.**
Selecting Cellular Mode

**Select Cellular Preferred Mode**
When this mode is active, your phone uses your cellular service if possible. If you are out of range, your phone switches to satellite mode. If this happens, you will see the 🌋 (satellite mode) indicator in the lower left corner of your display.

**Tip:** You must have a Cellular Cassette installed in your phone for these selections to work properly.

1. Follow the steps in “Getting to Mode Selection...” to get to Cellular Preferred.
2. Press OK to select.
   If you see the message Check Cassette or Insert Cassette, make sure your Cellular Cassette is installed properly.

**Select Cellular Always Mode**
When you select this feature, your system always accesses the cellular network.

1. Follow the steps in “Getting to Mode Selection...” to get to Cellular Always.
2. Press OK to select.
   If you see the message Check Cassette or Insert Cassette, make sure your Cellular Cassette is installed properly.
**Timing Your Calls**

Your phone's call meters give you a variety of options for tracking the time you spend on the phone. You can monitor the length of individual calls, set a timer to track monthly usage, or have the phone alert you with tones at specific intervals.

**Note:** The features described in this chapter are only available in satellite mode.

The table below shows the features available on the Call Meters menu. The Call Meters menu is only available in satellite mode. See “Selecting a Mode” on page 185 for more information on changing modes.

Cellular Mode

This menu is not available in cellular mode.
Showing Call Timers

Call timers help you track your airtime. Keep a running tab of your monthly usage or view the airtime of your most recent call.

Show the Time of the Last Call

Use this feature to display the elapsed time of your most recent call.

1. **Follow the steps in** “Getting to Show Call Timers...” to get to Show Last Call, and then **press OK** to select.
   
   You will see the airtime of the most recent call in hours, minutes, and seconds. After several seconds, the display returns to Show Last Call.

2. **Press and hold** ✈ to exit the menu.

**Note:** The last call timer shows elapsed time of the most recent call made since your phone was turned on. This information is not saved when you shut off the phone.

This feature is not available in cellular mode.

---

*Getting to Show Call Timers...*

1. Press ✈ until you see Call Meters, and then press OK.
2. Press ✈ to scroll to Show Call Timers, and then press OK.
3. Press ✈ to scroll to one of the features described below.
Getting to Show Call Timers...

1. Press \(\text{MENU}\) until you see Call Meters, and then press \(\text{OK}\).
2. Press \(\text{MENU}\) to scroll to Show Call Timers, and then press \(\text{OK}\).
3. Press \(\text{MENU}\) to scroll to one of the features described below.

Show Total Time for All Calls

**Satellite Mode**

Use this feature to display your total airtime since you last reset the Call Timer.

1. **Follow the steps in** “Getting to Show Call Timers...” to get to Total For All Calls, and then press \(\text{OK}\) to select.

   You will see the airtime accumulated since the timer was last reset. The airtime is displayed in hours, minutes, and seconds. After several seconds, the display returns to Total For All Calls.

2. Press and hold \(\text{CLR}\) to exit the menu.

**Cellular Mode**

This feature is not available in cellular mode.

Reset All Timers

**Satellite Mode**

Reset your timers at the beginning of each billing cycle to keep track of your spending.

1. **Follow the steps in** “Getting to Show Call Timers...” to get to Reset All Timers, and then press \(\text{OK}\) to select.

   You will see Completed. The display then returns to Reset All Timers.

2. Press and hold \(\text{CLR}\) to exit the menu.

**Note:** This does not reset the Lifetime Timer described on page 198.

**Cellular Mode**

This feature is not available in cellular mode.
Setting Audible Call Timers

Let your phone watch the clock for you. The call timers signal at a set time or interval with beeps only you can hear.

**Set the Single Alert Timer**

Use this feature to set your phone to alert you after an elapsed time.

1. **Follow the steps in “Getting to Audible Call Timers...”** to get to Single Alert Timer, and then press OK to select.

2. Press MENU to scroll to On or Off, and then press OK to select.
   - If you select On, you will see Enter Seconds. Continue with step 3.
   - If you select Off, you will see Completed. Continue with step 4.

3. Press OK to accept the current setting. You will see Seconds XXX.
   or

   **Enter a number** from 11 to 999, and then press OK. You will see Seconds XXX.

4. **Press and hold** to exit the menu.

This feature is not available in cellular mode.
Set the Repetitive Timer

Use this feature to set your phone to alert you at specific intervals, for example every 45 seconds.

1. **Follow the steps in** “Getting to Audible Call Timers...” to get to Repetitive Timer, and then press **OK** to select.

2. Press **M** to scroll to On or Off, then press **OK** to select.
   - If you select On, you will see Enter Seconds. Continue with step 3.
   - If you select Off, you will see Completed. Continue with step 4.

3. Press **OK** to accept the current setting. You will see Seconds XXX.
   or
   **Enter a number** from 11 to 999, and then press **OK**. You will see Seconds XXX.

4. **Press and hold** **C** to exit the menu.

Satellite Mode

Cellular Mode

This feature is not available in cellular mode.
**Showing the In-Call Timer**

Use this feature to display a running clock of the airtime elapsed while on a call.

1. **Follow the steps in “Getting to Call Meters...”** to get to **Set In-Call Display**, and then press OK to select.

2. Press MENU to scroll to **Show Time Per Call or No In-Call Display**, and then press OK to select.

3. Press and hold ⏪ to exit the menu.

This feature is not available in cellular mode.
Timing Your Calls

Showing the Lifetime Timer

**Satellite Mode**

Use this feature to show the total time of all calls for the life of your phone.

Note: This feature is available only when the extended menus are activated. See “Activating Extended Menus” on page 161.

1. **Follow the steps in** “Getting to Call Meters...” to get to Lifetime Timer, and then press OK to select.

   You will see the total airtime of your phone since it was manufactured.

2. **Press and hold** to exit the menu.

**Cellular Mode**

This feature is not available in cellular mode.

Tip: The lifetime timer can not be reset. The Reset All Timers feature has no effect on this timer.
Customizing the Menu System

This chapter shows you several ways to customize the menu system to suit your personal needs. You can hide the menu features you don’t use regularly, and you can add your favorite features to the Quick Access menu for instant recall.
Personalizing the Options Menu

You can customize the Options menu by moving features in and out of the extended menus. Features that you place on the extended menu are hidden when extended menus are turned off, and become visible when you activate the extended menus.

**Note:** The default factory setting for your phone is extended menus activated.

**Move Menu Features**

To move menu features:

1. **Find the feature** you want to move.
2. **Press and hold** to. You will see one of two responses depending on where that menu feature is currently located. If you see:

<table>
<thead>
<tr>
<th>Message</th>
<th>Description</th>
</tr>
</thead>
</table>
| Remove From Short Menus (The feature is in the short menu). | Press to move the feature to the extended menu. You will see Menu Item Moved.  

or  

Press to scroll to Leave in Short Menus, and then press to select. You will see Move Cancelled. |

| Add To Short Menus (The feature is in the extended menu). | Press to move the feature to the short menu. You will see Menu Item Moved.  

or  

Press to scroll to Leave in Long Menus, and then press to select. You will see Move Cancelled. |

**Note:** Some features and submenus cannot be moved. You will see Cannot Move Menu Item.
**Activate/Deactivate Extended Menus**

Use the Options menu to activate and deactivate extended menus. Activate them when you need access to every feature. Deactivate them for everyday use.

1. Press \[ \text{Menu} \] until you see Phone Setup, and then press \[ \text{OK} \] to select.
2. Press \[ \text{Menu} \] to scroll to Extended Menus, and then press \[ \text{OK} \] to select.
3. Press \[ \text{Menu} \] to scroll to either On or Off, and then press \[ \text{OK} \] to select.

All hidden features are accessible when you activate the extended menus.

**Access Hidden Features**

If you want to access a feature hidden in the extended menus, but don’t want to leave the extended menus active, you can use this shortcut:

**Press and hold** \[ \text{Menu} \] for a few seconds.

All extended menus features remain accessible until you exit the Options menu.
Personalizing the Quick Access Menu

You can replace the default Quick Access menu features described on page 71 with any of the following features.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Quick Access Feature</th>
</tr>
</thead>
<tbody>
<tr>
<td>❃</td>
<td>Find by Location recalls a phone book entry by its memory location number.</td>
</tr>
<tr>
<td>🔌</td>
<td>Add Entry to Phone stores entered numbers in the next available phone memory location.</td>
</tr>
<tr>
<td>🔌</td>
<td>Add Entry to SIM stores entered numbers in the next available SIM card location.</td>
</tr>
<tr>
<td>🔈</td>
<td>Ring Volume displays and sets the incoming call ring tone volume.</td>
</tr>
<tr>
<td>📡</td>
<td>Check Signal checks the strength of the signal from the satellite network.</td>
</tr>
<tr>
<td>📣</td>
<td>Switch Memory switches one-touch dialing between the phone and SIM memories depending on the current setting.</td>
</tr>
<tr>
<td>🕒</td>
<td>Last Call Timer displays the duration of your last call.</td>
</tr>
<tr>
<td>📚</td>
<td>Show Services displays a list of service phone numbers programmed by your service provider.</td>
</tr>
<tr>
<td>🦚</td>
<td>Mode Selection lets you switch between satellite and cellular service when you have an optional Cellular Cassette installed.</td>
</tr>
</tbody>
</table>

To change a default quick access feature to one of the features listed above:

1. Press 🎤 and then press 📏 to scroll to the feature you wish to change.
2. Press and hold 🟢 to access the list of features available.
3. Press 📏 to scroll through the list until you find the desired feature.
4. Press 🟢 to store the displayed feature in the new location. You will see Completed.
# Troubleshooting

This chapter tells you what to do if you experience one of the following problems:

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
</table>
| You can’t turn the phone’s power on. | • Did you press and hold the 0 key for three seconds to turn the phone’s power on?  
  • Check the battery. Is it charged, properly fitted, and are the contacts clean and dry? |
| You can’t make calls.         | • Check the antenna. Is it fully extended and rotated? Do you have a clear unobstructed view of the sky?  
  • Did you enter the number in international format? All calls made from the Iridium satellite system must be in international format (in satellite mode only).  
  • Check the signal strength indicator. If the signal is weak, move to an open space or, if you are in a building, move closer to a window.  
  • Check the Network Selection settings. Try to register manually in satellite mode. In GSM cellular mode, try a manual search and select another network.  
  • Check your operator coverage map.  
  • Is Restricted displayed? Check the call barring setting.  
  • Has a new SIM card been inserted? Check that no new restrictions have been imposed.  
  • Check to see if your fixed dialing list is enabled. If so, you can only make calls to numbers or prefixes that are on the list. To make calls in cellular mode, you must disable this feature from satellite mode. |
<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
</table>
| You can’t receive calls.        | • Check to see that your phone is powered on.  
• Check the antenna. Is it fully extended and rotated? Do you have a clear unobstructed view of the sky?  
• Check the signal strength indicator. If the signal is weak, move to an open space or, if you are in a building, move closer to a window.  
• Check the call forwarding and call barring settings.  
• Check the ringer setting. If it is off, there is no audible ringer.  
• Check to see if your fixed dialing list is enabled. To receive calls in cellular mode, you must disable this feature from satellite mode. |
| You can’t make international calls. | • Have you included the relevant codes? Press and hold the 0+ key to display the international dialing prefix (+) and then enter the appropriate country code followed by the phone number.  
• If you are in cellular mode, some service providers automatically bar the ability to make international calls. Contact your service provider.  
• Are you in a CDMA/AMPS cellular mode? You must map the international access code in order to use the 0+ key to display the international dialing prefix (+). |
| Your phone will not unlock.     | • Have you inserted a new SIM card? Enter the new PIN code.  
• Do you have a replacement phone? Enter the default phone unlock code — 1234.  
• Have you forgotten the unlock code? Press to change the unlock code (you need your security code). |
| Your PIN is blocked.            | Enter the PIN unblocking key (PUK1) or contact your service provider. See "Unblock the PIN Code” on page 158 for additional information.                                                                       |
| Your PIN2 is blocked.           | Enter the PIN2 unblocking key (PUK2) or contact your service provider. See “Unblock the PIN2 Code” on page 160 for additional information.                                                                     |
| Your SIM card will not work.    | • Is the card inserted the correct way?  
• Is the card visibly damaged or scratched? Return the card to your service provider.  
• Check the SIM and phone contacts. If they are dirty, clean them with an antistatic cloth. |
<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
</table>
| You can’t access your messages.                  | • Are you in the correct mode? If you do not have a GSM cellular cassette installed, you must be in satellite mode to access your messages.  
• Is your GSM Cellular Cassette inserted? In order to access messages from cellular mode, you must have a GSM Cellular Cassette inserted. |
| You can’t cancel call forwarding or call barring. | Wait until you are in an area with good network coverage and try again.                       |
| The 📮 (message) indicator is flashing.           | There is not enough memory available to store another message. Use the Messages menu to delete one or more messages. |
| The battery won’t charge.                        | • Check the charger. Is it properly connected? Are its contacts clean and dry?  
• Check the battery contacts. Are they clean and dry?  
• Check the battery temperature. If it is warm, let it cool before recharging.  
• Is it an old battery? Battery performance declines after several years of use. Replace the battery.  
• Make sure you have a Motorola approved battery installed. If you see Invalid Batt. in the display, you will not be able to charge this battery. |
| The battery drains faster than normal.           | • Are you in an area of variable coverage? This uses extra battery power.  
• Is your antenna fully rotated and extended? Do you have a clear unobstructed view of the sky? This helps use less battery power.  
• Is it a new battery? A new battery needs two to three charge/discharge cycles to attain normal performance.  
• Is it an old battery? Battery performance declines after several years of use. Replace the battery.  
• Is it a battery that hasn’t been completely discharged? Allow the battery to fully discharge (until the phone turns itself off) and then charge the battery overnight.  
• Are you using your phone in extreme temperatures? At extreme hot or cold temperatures, battery performance is significantly reduced. |
<p>| You find your phone becoming warm during use.    | You may notice this during long calls or during charging. The heat is produced by the electronic components within your phone and is quite normal. |</p>

| Your SIM card is inserted in the phone but the display says:           | • Check Card or Insert Card. Check that the SIM card has been inserted correctly. The contacts of the SIM card may be dirty. Turn the phone off, remove the SIM card and rub the contacts with a clean cloth. Replace the card in the phone.  
  • Blocked or 😞 Blocked. Enter the PIN unblocking key (PUK1) or the PIN2 unblocking key (PUK2) respectively, or contact your service provider. See “Unblock the PIN Code” on page 158 and “Unblock the PIN2 Code” on page 160 for additional information.  
  • Bad Card See Supplier. Please contact your service provider.      |
| Your phone has a Cellular Cassette installed but the display says:      | Check Cassette or Insert Cassette. Check that the Cellular Cassette has been inserted correctly.                                                                                                           |
| You do not have a Cellular Cassette and your phone says Insert Cassette | Make sure you have the correct mode settings selected. You are either in Cellular Always mode or in a Preferred mode.                                                                                         |
| You find your phone’s prompts in a language other than your own.       | 1. Press and hold the 📞 key to return to the idle display.  
  2. Press 📌 2 📌 6 📌 OK to go directly to the language selection submenu.  
  3. Press 📌 until you see your preferred language.  
  4. Press OK to select.                                                                                           |
